## **Abstracts**

### Market Overview:

The global fire hose market size reached US\$ 648.2 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 865.1 Million by 2028, exhibiting a growth rate (CAGR) of 4.7% during 2023-2028. The increasing incidences of fire accidents across various industrial verticals, such as oil and gas and mining, along with the growing need for fire extinguishing equipment to reduce injuries, fatalities, and property loss represent some of the key factors driving the market.

A fire hose refers to a heavy-duty, high-pressure firefighting system that discharges water or other fire retardants, including foam, from a hydrant for controlling and extinguishing fire from specific places or areas. It is fabricated from high-quality rubber or synthetic materials via the extrusion method, and its inner diameter is larger than the garden hose, which enables the equipment to carry gallons of water without hampering the movements of the firefighter. The embedded components of the product are lightweight and offer resistance to sunlight and chemicals. After their production, the fire hose is evaluated to avoid imminent failures during operations. Fire hose is reliable, flexible, easy to use, provides a substantial amount of water which is equivalent to using several extinguishers at once with continuous replenishments, and ensures optimal safety of individuals present on the site. As a result, a fire hose is extensively utilized by firefighters in municipal fire brigades, refineries, mills, ships, and commercial constructions.

## Fire Hose Market Trends:

The increasing incidences of fire accidents across various industrial verticals represent one of the key factors driving the market growth. Moreover, the steadily expanding construction sector is acting as another major growth-inducing factor. In line with this, the widespread utilization of fire hose in both the residential and commercial sectors, along with the implementation of stringent building safety protocols and codes by governments of various nations, is contributing to the market growth. The rising safety concerns amongst consumers and the execution of diverse safety standards in different industries are supporting the market growth. Furthermore, significant technological advancements, such as the utilization of advanced solutions to engineer improved variants of fire hoses with innovative features, maximized life-shelf, less maintenance, and capability to tackle civic disasters and bushfires, are favoring the market growth. This is further influenced by the development of state-of-the-art firefighting equipment solutions with unlimited air supply. The introduction of sustainable and more durable product variants is also propelling the market growth. Apart from this, the ongoing investments in research and development (R&D) activities and the continuous product diversification by key players are creating a positive outlook for the market.

## Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global fire hose market, along with forecasts at the global, regional, and country level from 2023-2028. Our report has categorized the market based on type and application.

## Type Insights:

0.8MPa  
1.0MPa  
1.3MPa  
1.6MPa  
Others

The report has also provided a detailed breakup and analysis of the fire hose market based on the type. This includes 0.8MPa, 1.0MPa, 1.3MPa, 1.6MPa and others. According to the report, 0.8MPa represented the largest segment.

## Application Insights:

Municipal Fire Service  
Industrial Fire Service  
Commercial Fire Service  
Others

A detailed breakup and analysis of the fire hose market based on the application has also been provided in the report. This includes municipal fire services, industrial fire services, commercial fire services and others. According to the report, municipal fire services accounted for the largest market share.

#### Regional Insights:

North America  
United States  
Canada  
Asia Pacific  
China  
Japan  
India  
South Korea  
Australia  
Indonesia  
Others  
Europe  
Germany  
France  
United Kingdom  
Italy  
Spain  
Russia  
Others  
Latin America  
Brazil  
Mexico  
Others  
Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets that include North America (the United States and Canada); Asia Pacific

(China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, North America was the largest market for fire hose. Some of the factors driving the North America fire hose market included the increasing number of fire accidents across various industrial verticals, availability of improved product variants, and stringent governmental regulations for safety against fire hazards.

#### Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global fire hose market. Detailed profiles of all major companies have also been provided. Some of the companies covered include All-American Holdings LLC, Angus Fire, Delta Fire Ltd, Dixon Valve & Coupling Company LLC, Drägerwerk AG & Co. KGaA, Kuriyama of America Inc. (Kuriyama Holdings Corporation), Mercedes Textiles Limited, National Fire Equipment Ltd., NewAge Fire Protection Industries Pvt. Ltd., Niedner Inc. (Logistec Corp), North America Fire Hose Corporation, Superior Fire Hose Corp., etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

#### Key Questions Answered in This Report:

How has the global fire hose market performed so far and how will it perform in the coming years?

What are the drivers, restraints, and opportunities in the global fire hose market?

What are the key regional markets?

Which countries represent the most attractive fire hose markets?

What is the breakup of the market based on the type?

What is the breakup of the market based on the application?

What is the competitive structure of the fire hose market?

Who are the key players/companies in the global fire hose market?
