Abstracts

The global floss picks market size reached US\$ 670.9 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 834.3 Million by 2028, exhibiting a growth rate (CAGR) of 3.70% during 2022-2028. The increasing awareness regarding the importance of oral hygiene, rising prevalence of numerous dental illnesses, and escalating demand for portable and disposable product variants for people on-the-go represent some of the key factors driving the market.

Floss picks refer to a dental hygiene tool that serves the purpose of both dental floss and toothpicks in a single product. They comprise of a small plastic handle with a short piece of dental floss stretched between two prongs on one end, and a pointed tip at the other end that can be used as a toothpick. The handle is ergonomically designed to provide a comfortable grip, and the floss is pre-threaded to eliminate the need to wrap floss around the fingers. Floss picks are small and disposable, making them portable and convenient to use while traveling. The tool helps remove food debris from the interdental spaces and the gum line, reduces plaque accumulation between teeth, and prevents dental caries and gum disease. Being a versatile tool, floss picks offer both toothpick and dental floss functionality, and unlike traditional flossing, floss picks do not require exceptional dexterity or skill, making them easy to use for most individuals.

Floss Picks Market Trends:

The increasing awareness regarding the importance of oral hygiene is a significant factor driving the market. This can be attributed to the shifting consumer preference toward beauty and grooming. In line with this, the escalating demand for portable and disposable product variants for people on-the-go is also providing an impetus to the market. Moreover, the growing prevalence of numerous dental issues, such as cavities, gum disease, and tooth decay, is resulting in an increased demand for oral care

products, thereby fueling the market. In addition to this, continual innovations in floss picks design and features by the manufacturers to enhance consumer comfort and effectiveness is resulting in a higher product uptake among the masses. Additionally, the rapid expansion of distribution channels, including e-commerce and retail stores, leading to more accessibility for consumers, is creating lucrative opportunities in the market. The market is further driven by the changing dietary habits and the increasing sedentary lifestyle of the masses. Apart from this, the rising consciousness regarding the impact of plastic pollution on the environment leading to the increasing demand for eco-friendly floss picks made from biodegradable materials is further driving the market. Some of the other factors contributing to the market include rapid urbanization, inflating disposable income levels, increasing product demand from developing economies, and extensive research and development (R&D) activities conducted by key players.
