Abstracts

The global flush mount photo album market size reached US\$ 3.5 Billion in 2022.

Looking forward, IMARC Group expects the market to reach US\$ 4.7 Billion by 2028, exhibiting a growth rate (CAGR) of 5.0% during 2022-2028.

Flush mount photo album comprises photographic prints that are dry mounted on a thick inner substrate with natural silver halide photo paper. It has hard covers made using leather, leatherette, or glass, which provides a luster finish and protects against spills and stains. Nowadays, numerous companies are offering personalized flush mount photo albums via online channels. These customized albums allow customers to select from a wide range of colors and fabrics with optional cameo windows and embossed titles. As a result, they are gaining immense popularity as gifting options on special occasions like birthdays, graduations, weddings, and anniversaries.

Flush Mount Photo Album Market Trends:

The growing trend of theme-based weddings represents one of the key factors influencing the demand for flush mount photo albums as they have a strong, tight, fine, and superior core than regular photo albums. Moreover, rapid urbanization, increasing purchasing power, and the growing popularity of smart home décor are catalyzing the demand for luxurious, handmade albums crafted using premium materials. Apart from this, the leading market players are using advanced materials to produce innovative albums. For instance, they are utilizing heavy E-photo matte paper that delivers smooth gradients and gives images better vibrancy on lighter tones and stunning panoramic views. They are also offering personalized albums made using high definition (HD) printing technology for higher quality and durability and a photo-realistic experience, which is driving the market further. Besides this, the increasing demand for contemporary album designs, the easy availability of these albums on online platforms, and the rising concept of photojournalism are some of the other factors anticipated to

fuel the market growth in the upcoming years.
