Abstracts

The global flushing systems market reached a value of US\$ 2.64 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 3.18 Billion by 2027, exhibiting a CAGR of 3.1% during 2022-2027. Keeping in mind the uncertainties of COVID-19, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

Flushing systems are effective and efficient waste removal solutions with minimal water consumption. They usually consist of a cistern, handle, valve, sensor, water closet, flushing pipe, and various other components depending on the user's requirements. At present, they are widely utilized in homes, public places, government buildings, and other commercial establishments to maintain cleanliness and hygiene in restrooms. Nowadays, recent advances have led to the development of automated, waterless flushing systems that can dispose of waste matter via a vacuum.

Flushing Systems Market Trends:

The rising number of initiatives undertaken by governing agencies of numerous countries to spread awareness about hygiene, sanitation, and efficient waste management practices represents one of the key factors influencing the market positively. Moreover, the thriving travel and tourism industry, in confluence with the increasing water conservation needs, is driving the adoption of automated flushing systems at malls, hotels, resorts, and other accommodation facilities. Apart from this, a significant rise in the construction of contemporary homes due to rapid urbanization and improving income levels is catalyzing the demand for premium flushing systems around the world. Additionally, due to the coronavirus disease (COVID-19) outbreak and the

growing safety concerns, enterprises are focusing on creating a smart workplace, which is propelling the demand for self-cleaning bathroom vanities like flushing systems. Furthermore, market players are introducing a wide range of innovative products to expand their product portfolio and overall presence in the market. For instance, SCG Cement-Building Materials Company Limited collaborated with world-renowned product designer Naoto Fukasawa to introduce a unique bathroom series. This series includes a washbasin, faucet, toilet, showerhead, and mirror with built-in light-emitting diode (LED).

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global flushing systems market, along with forecasts at the global, regional and country level from 2022-2027. Our report has categorized the market based on type, technology, installation type and end user.

Breakup by Type:

- Gravity Flush
- Dual Flush
- Pressure-Assisted Flush
- Tornado Flush
- Others

Breakup by Technology:

- Manual
- Sensors
- Remote Control
- Waterless Flushing

Breakup by Installation Type:

- Surface Flush
- Rear Wall Mounting
- Others

Breakup by End User:

- Residential

Commercial

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Alcaplast s.r.o., Caroma Industries Limited (GWA Group Limited), Cera Sanitaryware Limited, Geberit AG, Grohe AG, Hindware Homes, Jaquar Group, Kazema General Trading L.L.C, Kohler Co., Roca Sanitario S.A, Sanipex Group, SCHELL GmbH & Co. KG, TOTO Ltd., Wirquin Ltd. and The Siam Cement Group Public Company Limited.

Key Questions Answered in This Report:

How has the global flushing systems market performed so far and how will it perform in the coming years?

What has been the impact of COVID-19 on the global flushing systems market?

What are the key regional markets?

What is the breakup of the market based on the type?

What is the breakup of the market based on the technology?

What is the breakup of the market based on the installation type?

What is the breakup of the market based on the end user?

What are the various stages in the value chain of the industry?

What are the key driving factors and challenges in the industry?

What is the structure of the global flushing systems market and who are the key players?

What is the degree of competition in the industry?
