## Abstracts

The global fogless mirrors market size reached US\$ 472.3 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 651.2 Million by 2028, exhibiting a growth rate (CAGR) of 5.50% during 2022-2028.

Fogless mirrors are installed in the bathroom to prevent condensation build-up and provide a clear reflection. They have a heating element, light assembly, and reflective coating attached to the transparent substrate. They are widely available in different shapes and forms with advanced features, such as infrared on and off switches. Nowadays, leading manufacturers are offering high-definition (HD) mirrors with light-emitting diodes (LEDs) that add a touch of luxury and glamour to the bathroom. A significant rise in consumer spending capacities is catalyzing the demand for fogless mirrors around the world.

### Fogless Mirrors Market Trends:

The escalating demand for smart, modern homes with lavish interior designs on account of increasing urbanization represents one of the key factors contributing to the growth of the market. Moreover, the recovery of the travel and tourism industry is catalyzing the demand for fogless mirrors in luxury hotels and restaurants to enhance the aesthetic value. A considerable increase in the booking of hotel rooms for events and corporate meetings is also bolstering the market growth. Apart from this, the emerging trend of contemporary furniture and office design in commercial establishments is influencing the adoption of fogless mirrors across the globe. Advanced fogless mirrors are further gaining traction in spas and salons. In addition, sedentary lifestyles and hectic schedules of working professionals and the growing health consciousness among individuals are driving the need for therapeutic spas to reduce their anxiety and stress.

This, in turn, is impelling the growth of the market. Furthermore, several companies are offering compact, portable-size mirrors at an affordable rate for travel use. They are also creating an online presence to expand their business via e-commerce platforms.
