## **Abstracts**

The 7 major ganglion cyst markets are expected to exhibit a CAGR of 5.38% during 2024-2034.

The ganglion cyst market has been comprehensively analyzed in IMARC's new report titled "Ganglion Cyst Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". A ganglion cyst refers to a noncancerous, fluid-filled lump that typically forms near a joint or tendon, most commonly in the hand or wrist. It is generally round or oval-shaped and can vary in size. The cyst is usually painless, but it can cause discomfort or mild pain, especially when it presses on nearby nerves or tendons. Numerous symptoms associated with the disorder include a soft or firm bump under the skin, redness, tenderness, swelling, a sensation of tingling or numbness, muscle weakness, etc. Individuals suffering from the condition may also experience difficulty performing certain activities that require a full range of motion. The diagnosis of a ganglion cyst typically includes a combination of the patient's physical examination and medical history assessment. A transillumination technique, which involves shining a light through the cyst to analyze its contents and determine if it is filled with clear fluid, is also recommended. In some cases, various imaging tests, including ultrasounds, MRIs, X-rays, etc., may be required to confirm the diagnosis or rule out other underlying conditions.

The increasing incidences of osteoarthritis, which can gradually wear away the cartilage, are primarily driving the ganglion cyst market. In addition to this, the rising prevalence of abnormal accumulations of synovial fluid within a joint or tendon sheath that can result in the formation of a lump is further creating a positive outlook for the market. Moreover, the widespread adoption of corticosteroid injections to reduce

inflammation and manage the symptoms of the ailment is also bolstering the market growth. This therapy works by inhibiting the proliferation and activity of cells within the cyst to prevent it from enlarging or recurring. Additionally, the inflating application of arthroscopic surgery on account of its various benefits, such as minimal invasiveness, reduced postoperative pain, faster recovery time, etc., is acting as another significant growth-inducing factor. Furthermore, the emerging popularity of laser therapy, which helps to decrease the chances of relapse by targeting the cyst more precisely and potentially disrupting its structure, is expected to drive the ganglion cyst market during the forecast period.

IMARC Group's new report provides an exhaustive analysis of the ganglion cyst market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for ganglion cyst and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the ganglion cyst market in any manner.

#### Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

#### Countries Covered

United States

Germany

France

United Kingdom

Italy

Spain

Japan

## Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario

Historical, current, and future performance of the ganglion cyst market

Historical, current, and future performance of various therapeutic categories in the market

Sales of various drugs across the ganglion cyst market

Reimbursement scenario in the market

In-market and pipeline drugs

Competitive Landscape:

This report also provides a detailed analysis of the current ganglion cyst marketed drugs and late-stage pipeline drugs.

## In-Market Drugs

Drug Overview

Mechanism of Action

Regulatory Status

Clinical Trial Results

Drug Uptake and Market Performance

## Late-Stage Pipeline Drugs

Drug Overview

Mechanism of Action

Regulatory Status

Clinical Trial Results

Drug Uptake and Market Performance

Key Questions Answered in this Report:

Market Insights

How has the ganglion cyst market performed so far and how will it perform in the coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the ganglion cyst market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the ganglion cyst market across the seven major markets and

what will be the expected growth over the next ten years?  
What are the key unmet needs in the market?

### Epidemiology Insights

What is the number of prevalent cases (2018-2034) of ganglion cyst across the seven major markets?  
What is the number of prevalent cases (2018-2034) of ganglion cyst by age across the seven major markets?  
What is the number of prevalent cases (2018-2034) of ganglion cyst by gender across the seven major markets?  
How many patients are diagnosed (2018-2034) with ganglion cyst across the seven major markets?  
What is the size of the ganglion cyst patient pool (2018-2023) across the seven major markets?  
What would be the forecasted patient pool (2024-2034) across the seven major markets?  
What are the key factors driving the epidemiological trend of ganglion cyst?  
What will be the growth rate of patients across the seven major markets?

### Ganglion Cyst: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?  
What are the key pipeline drugs and how are they expected to perform in the coming years?  
How safe are the current marketed drugs and what are their efficacies?  
How safe are the late-stage pipeline drugs and what are their efficacies?  
What are the current treatment guidelines for ganglion cyst drugs across the seven major markets?  
Who are the key companies in the market and what are their market shares?  
What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the ganglion cyst market?  
What are the key regulatory events related to the ganglion cyst market?  
What is the structure of clinical trial landscape by status related to the ganglion cyst market?  
What is the structure of clinical trial landscape by phase related to the ganglion cyst market?  
What is the structure of clinical trial landscape by route of administration related to the ganglion cyst market?

### **1 PREFACE**

### **2 SCOPE AND METHODOLOGY**

- 2.1 Objectives of the Study
- 2.2 Stakeholders
- 2.3 Data Sources
  - 2.3.1 Primary Sources
  - 2.3.2 Secondary Sources
- 2.4 Market Estimation
  - 2.4.1 Bottom-Up Approach
  - 2.4.2 Top-Down Approach
- 2.5 Forecasting Methodology

### **3 EXECUTIVE SUMMARY**

### **4 GANGLION CYST - INTRODUCTION**

- 4.1 Overview
- 4.2 Regulatory Process
- 4.3 Epidemiology (2018-2023) and Forecast (2024-2034)
- 4.4 Market Overview (2018-2023) and Forecast (2024-2034)
- 4.5 Competitive Intelligence

### **5 GANGLION CYST - DISEASE OVERVIEW**

- 5.1 Introduction
- 5.2 Symptoms and Diagnosis
- 5.3 Pathophysiology
- 5.4 Causes and Risk Factors
- 5.5 Treatment

### **6 PATIENT JOURNEY**

### **7 GANGLION CYST - EPIDEMIOLOGY AND PATIENT POPULATION**

- 7.1 Epidemiology - Key Insights

- 7.2 Epidemiology Scenario - Top 7 Markets
  - 7.2.1 Epidemiology Scenario (2018-2023)
  - 7.2.2 Epidemiology Forecast (2024-2034)
  - 7.2.3 Epidemiology by Age (2018-2034)
  - 7.2.4 Epidemiology by Gender (2018-2034)
  - 7.2.5 Diagnosed Cases (2018-2034)
  - 7.2.6 Patient Pool/Treated Cases (2018-2034)
