Market Overview:

The GCC flooring market size reached US\$ 14.4 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 20.8 Billion by 2028, exhibiting a growth rate (CAGR) of 6.2% during 2023-2028.

Flooring refers to a layer of finished material used to cover a floor structure in order to provide a levelled surface. Vinyl sheets, ceramic tiles, rubber, natural stone, wood, and carpets and rugs are the most common type of flooring materials. These materials are selected on the basis of various factors, such as noise insulation, cleaning effort, comfort, endurance and cost. In the GCC region, the widespread refurbishment and new building projects have boosted the demand for flooring.

GCC Flooring Market Drivers:

In the GCC region, industrial development fuelled by huge investments made by the governments plays a crucial role in the growth of the flooring industry as all industrial facilities need fit-for-purpose flooring.

The increased focus on green buildings coupled with growing usage of eco-friendly flooring products in the GCC region is stimulating the demand for floorings manufactured from recycled raw materials.

Technological advancements in the flooring industry have resulted in improved product features such as digitally printed tile designs, availability of wide variety of colours, enhanced water resistance, etc., in turn, propelling the growth of the market.
