Abstracts

The GCC health insurance market size reached US\$ 17.4 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 28.5 Billion by 2032, exhibiting a growth rate (CAGR) of 5.5% during 2024-2032.

Health insurance is a service which covers medical and surgical expenses of the insured individual. It reimburses the expenses incurred due to illness and injury or pays the care provider directly. Health insurance offers considerable flexibility in terms of disease coverage, diagnosis and treatment for chronic ailments, emergency transportation, in-patient and day care management, maternity, dental care, psychiatric care, etc. They are available in multiple arrangements for the consumers such as private health insurance, public or government health insurance, managed care plans, indemnity, Point-of-Service (POS) plans, etc. The consumer can opt for the most suitable insurance plan depending upon their needs and requirements.

Historically, governments in the GCC region accounted for most of the healthcare requirements of their nationals. However, upon recognising that the “welfare state” approach is expensive and unsustainable in the long run, Saudi Arabia, Qatar, and Dubai and Abu Dhabi in the UAE have already introduced mandatory health insurance, while Bahrain, Oman and Kuwait are in the process of introducing it. Apart from the strong government support, the strong growth in the healthcare infrastructure and rising migration in the GCC region are also driving the GCC health insurance market. Additionally, rising healthcare costs and increasing awareness for health management has also catalyzed the demand for insurance policies in the region. In order to safeguard the consumers from exorbitant medical bills, insurance policymakers are designing programs that fit the exact need of the consumer.
