Abstracts

The 7 major gliosarcoma markets reached a value of US\$ 1.2 Billion in 2023. Looking forward, IMARC Group expects the 7MM to reach US\$ 1.9 Billion by 2034, exhibiting a growth rate (CAGR) of 4.38% during 2024-2034.

The gliosarcoma market has been comprehensively analyzed in IMARC's new report titled "Gliosarcoma Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Gliosarcoma is a rare and aggressive form of brain tumor that exhibits characteristics of both glioblastoma and sarcoma. It typically arises from the supportive tissue of the brain called glial cells, which provide structure and support to neurons. Some of the common symptoms associated with the ailment are persistent headaches, seizures, cognitive changes like memory loss or confusion, focal neurological deficits like weakness or sensory disturbances, personality changes, speech difficulties, etc. Various other indications may include visual disorders, nausea, vomiting, balance problems, changes in behavior or mood, etc. Diagnosing the condition involves a comprehensive evaluation that incorporates several diagnostic procedures and clinical assessments. The diagnostic process typically begins with neuroimaging techniques, including magnetic resonance imaging (MRI) or computed tomography (CT) scans, to visualize the brain and identify any abnormal masses or lesions. Once a suspicious lesion is identified, a biopsy is performed to confirm the diagnosis. Numerous advanced procedures, such as molecular profiling and genetic testing, may also be utilized to assess specific genetic alterations and molecular markers.

The increasing incidences of TP53 gene mutations, which can disrupt normal cell growth and division, thereby leading to the formation of tumors, are primarily driving the

gliosarcoma market. Furthermore, the inflating utilization of various immune checkpoint inhibitors, such as pembrolizumab or nivolumab, to stimulate the immune system and enhance anti-tumor responses is acting as another significant growth-inducing factor. Besides this, the escalating application of intensity-modulated radiation therapy, since it allows for precise delivery of radiation, thereby minimizing damage to surrounding healthy tissue, is also creating a positive outlook for the market. Additionally, the emerging popularity of several magnetic resonance imaging sequences, including diffusion-weighted imaging (DWI), perfusion imaging, spectroscopy, etc., that provide additional information about tumor characteristics, vascularity, and metabolism, is further bolstering the market growth. Moreover, the ongoing advancements in neurosurgical techniques, such as the introduction of fluorescence-guided resection and intraoperative imaging, which have improved the extent of tumor removal and increased the chances of achieving complete resection, are expected to drive the gliosarcoma market in the coming years.

IMARC Group's new report provides an exhaustive analysis of the gliosarcoma market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for gliosarcoma and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the gliosarcoma market in any manner.

Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

Countries Covered

United States

Germany

France
United Kingdom
Italy
Spain
Japan

Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario
Historical, current, and future performance of the gliosarcoma market
Historical, current, and future performance of various therapeutic categories in the market
Sales of various drugs across the gliosarcoma market
Reimbursement scenario in the market
In-market and pipeline drugs
Competitive Landscape:
This report also provides a detailed analysis of the current gliosarcoma marketed drugs and late-stage pipeline drugs.

In-Market Drugs

Drug Overview
Mechanism of Action
Regulatory Status
Clinical Trial Results
Drug Uptake and Market Performance

Late-Stage Pipeline Drugs

Drug Overview
Mechanism of Action
Regulatory Status
Clinical Trial Results
Drug Uptake and Market Performance

*Kindly note that the drugs in the above table only represent a partial list of marketed/pipeline drugs, and the complete list has been provided in the report.

Key Questions Answered in this Report:

Market Insights

How has the gliosarcoma market performed so far and how will it perform in the coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the gliosarcoma market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the gliosarcoma market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of gliosarcoma across the seven major markets?

What is the number of prevalent cases (2018-2034) of gliosarcoma by age across the seven major markets?

What is the number of prevalent cases () of gliosarcoma by gender across the seven major markets?

How many patients are diagnosed (2018-2034) with gliosarcoma across the seven major markets?

What is the size of the gliosarcoma patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of gliosarcoma?

What will be the growth rate of patients across the seven major markets?

Gliosarcoma: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for gliosarcoma drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the gliosarcoma market?

What are the key regulatory events related to the gliosarcoma market?

What is the structure of clinical trial landscape by status related to the gliosarcoma market?

What is the structure of clinical trial landscape by phase related to the gliosarcoma market?

What is the structure of clinical trial landscape by route of administration related to the gliosarcoma market?
