Abstracts

The global pharmaceutical market is expected to grow at a CAGR of 5% during 2011-2017, exceeding sales worth US\$ 1.1 Trillion by 2017. This market, however, is expected to undergo a number of transitions which would impact the course of its growth. These transitions include a shift of growth from the developed to the emerging markets, an increasing focus on biopharmaceuticals compared to small molecule drugs and an increasing preference for generics compared to their branded versions. As a result of these transformations; the need for a user friendly, robust and comprehensive pharmaceutical market intelligence has become imperative for investors, researchers, consultants, marketing strategists, and all those who are planning to foray into the pharmaceutical market in some form or the other.

IMARC Group, one of the world's leading research and advisory firms, introduces a new and revolutionary way to understand and evaluate the global pharmaceutical market with its Microsoft Excel based report entitled "Global Pharmaceutical Market Report & Forecast: 2012-2017". This report provides an analytical and statistical insight into the global pharmaceutical market. The study, which has been undertaken using desk based as well as primary market research has analyzed the following aspects of the global pharmaceutical market.
