Abstracts

The global radio advertising market size reached US\$ 35.3 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 46.7 Billion by 2027, exhibiting a growth rate (CAGR) of 4.7% during 2022-2027. Keeping in mind the uncertainties of COVID-19, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use industries. These insights are included in the report as a major market contributor.

Radio advertising represents one of the oldest forms of advertising across the globe. It broadcasts audio content to a vast audience and is relatively cheaper as compared to television advertising as no expenses are incurred in making complex and eye-catching visuals. Despite the advent of newer advertising platforms like the internet, radio still holds a considerable share in the market on account of reasons such as its portability. Moreover, as it acts as an influential route of publicity, it is widely preferred by both big and small companies worldwide.

Radio Advertising Market Trends:

Radio is an efficient and portable advertising medium that appeals to a broader audience. As a result, leading brands and advertisers rely on radio commercials to communicate with their target audience. It is also utilized by governing authorities of numerous countries and international organizations for mass outreach programs. Apart from this, due to the availability of radio stations in most parts of the world, radio acts as a sole source of information and entertainment for people residing in remote and rural regions. Moreover, individuals worldwide prefer listening to the radio while driving, exercising, playing video games, and performing daily chores. This, in confluence with the development of in-car media apps that support radio, is creating lucrative growth opportunities for advertisers. Furthermore, radio channels are employing innovative

solutions, such as radio automation software, which is integrated with pre-recorded audio content, such as songs, commercials, and interviews. This software also assists in operating multiple stations or channels, which is anticipated to create a favorable market outlook.
