The 7 major glomerulonephritis markets reached a value of US\$ 748.1 Million in 2023. Looking forward, IMARC Group expects the 7MM to reach US\$ 1,105.0 Million by 2034, exhibiting a growth rate (CAGR) of 3.61% during 2024-2034.

The glomerulonephritis market has been comprehensively analyzed in IMARC's new report titled "Glomerulonephritis Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Glomerulonephritis is a medical condition characterized by inflammation of the glomeruli, which are the tiny filters in the kidneys responsible for filtering waste and excess fluid from the blood. This disease can impair the normal functioning of the kidneys, leading to the buildup of toxins in the body. Individuals suffering from glomerulonephritis usually have no obvious signs of the illness. But in some cases, the most common indications include blood in the urine, which may make the urine look pink, brown, or red, fatigue, nausea, rashes, high blood pressure, shortness of breath, pain in the joints or abdomen, urinary inconsistency, swelling in the legs or face, etc. The diagnosis of this ailment typically involves several steps, such as a medical history, physical examination, imaging tests, blood workups, and a kidney biopsy. During the medical investigation, a healthcare practitioner will check for signs of kidney diseases, like high blood pressure and fluid retention. Additionally, blood workups and imaging studies are utilized to detect abnormalities and assess the structure and size of the kidneys.

The increasing incidences of diabetes and chronic high blood pressure that can damage the blood vessels and nephrons within the kidneys are primarily driving the glomerulonephritis market. In addition to this, the rising cases of autoimmune diseases, in which the immune system mistakenly attacks the body's own tissues, are also

bolstering the market growth. Furthermore, the inflating utilization of effective medications, like angiotensin-converting enzyme (ACE) inhibitors, diuretics, antihypertensive agents, etc., to manage the underlying indications of the ailment is acting as another significant growth-inducing factor. Besides this, the escalating application of intravenous immunoglobulin therapy, owing to its numerous benefits over conventional treatments, such as regulating the immune system, preserving renal function, and decreasing inflammation in patients, is further creating a positive outlook for the market. Moreover, the widespread adoption of plasmapheresis techniques, which help to remove harmful autoantibodies from the bloodstream, thereby reducing the burden on the kidneys and slowing down the progression of glomerular damage, is expected to drive the glomerulonephritis market in the coming years.

IMARC Group's new report provides an exhaustive analysis of the glomerulonephritis market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for glomerulonephritis and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the glomerulonephritis market in any manner.

Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

Countries Covered

United States

Germany

France

United Kingdom

Italy

Spain
Japan

Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario

Historical, current, and future performance of the glomerulonephritis market

Historical, current, and future performance of various therapeutic categories in the market

Sales of various drugs across the glomerulonephritis market

Reimbursement scenario in the market

In-market and pipeline drugs

Competitive Landscape:

This report also provides a detailed analysis of the current glomerulonephritis marketed drugs and late-stage pipeline drugs.

In-Market Drugs

Key Questions Answered in this Report:

Market Insights

How has the glomerulonephritis market performed so far and how will it perform in the

coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the glomerulonephritis market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the glomerulonephritis market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of glomerulonephritis across the seven major markets?

What is the number of prevalent cases (2018-2034) of glomerulonephritis by age across the seven major markets?

What is the number of prevalent cases (2018-2034) of glomerulonephritis by gender across the seven major markets?

How many patients are diagnosed (2018-2034) with glomerulonephritis across the seven major markets?

What is the size of the glomerulonephritis patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of glomerulonephritis?

What will be the growth rate of patients across the seven major markets?

Glomerulonephritis: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for glomerulonephritis drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the glomerulonephritis market?

What are the key regulatory events related to the glomerulonephritis market?

What is the structure of clinical trial landscape by status related to the glomerulonephritis market?

What is the structure of clinical trial landscape by phase related to the glomerulonephritis market?

What is the structure of clinical trial landscape by route of administration related to the glomerulonephritis market?
