Market Overview:

The global healthcare furniture market size reached US\$ 7.2 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 9.9 Billion by 2028, exhibiting a growth rate (CAGR) of 5.55% during 2023-2028.

Healthcare furniture is one of the key components of health management and infrastructure. It includes various products such as hospital beds, examination and bedside tables, recliners, recovery couches, cabinets, etc. These products find extensive usage in clinics, hospitals, nursing homes, health care facilities and diagnostic centres. It is widely believed that a well-designed set of furniture helps in improving the mood of the patient, which consequently influences the health and speed of recovery. At the same time, it aids in reducing work-related stress, monotony and risks of errors, thus creating a comfortable and conducive work environment for healthcare professionals.

Global Healthcare Furniture Market Trends:

An increasing number of specialty clinics and hospitals, along with the growing prevalence of chronic disorders across the globe is the key factor driving the growth of the market. Furthermore, the market is impacted by the ever-increasing number of physically challenged individuals who need high-quality medical assistance. Additionally, an increasing number of fatal injury cases owing to factors such as rising road accidents has also created a positive outlook for the market. Any kind of fatal injury requires the involvement of surgery and other related medical procedure, which

prolongs the hospital stay for the patient. This has consequently accelerated the demand for comfortable healthcare furniture for both the patients and their family members. This has also led to the need for renovating the existing healthcare infrastructure of several healthcare facilities across the globe. Moreover, continuous technological developments and the launch of innovative product variants such as the introduction of motorized stretcher chairs, mattress are also projected to favor the growth of the market. Other factors including rapid urbanization, rising disposable income and increasing per capita health care expenditures across the globe are also contributing significantly to the market growth.
