Abstracts

The global healthcare predictive analytics market size reached US\$ 9.5 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 46.9 Billion by 2032, exhibiting a growth rate (CAGR) of 18.8% during 2024-2032.

Healthcare predictive analytics refers to advanced software that automatically analyzes data to improve the overall patient outcomes and provides more effective care. It is widely used for remote monitoring, diagnosis, treatment course design, prognosis, clinical decision support, care quality improvement, and care cost reduction purposes. It can store large amounts of data, predict a patient's response and provide a more personalized healthcare experience. Healthcare predictive analytics aids in improving patient healthcare, easing patient diagnosis, detecting patients at higher risks, gaining better insights and enabling healthcare practitioners to make well-informed decisions. Furthermore, the software functions are based on the patient's environment, risk factors, genetics and medical history.

Healthcare Predictive Analytics Market Trends:

The significant growth in the healthcare industry across the globe is creating a positive

outlook for the market. Healthcare predictive analytics is widely adopted to improve efficiency in clinical operations and health outcomes through enhanced care and patient engagement. In line with this, the increasing adoption of electronic health record (EHR) systems to help in the management of patient outcomes and provide accurate, up-to-date, and complete information is favoring the market growth. Apart from this, various advancements in technology, such as the integration of the internet of things (IoT) and big data that assists in collecting patient records and test results, analyzing disease patterns, and increasing patient comfort and convenience, are providing an impetus to the market growth. Additionally, the extensive utilization of the software by healthcare payers due to its cost-effectiveness, reduced number of unnecessary tests, fraud detection and improved decision-making is positively impacting the market growth. Other factors, including the increasing geriatric population prone to chronic diseases, significant improvements in healthcare infrastructure, and the implementation of various government initiatives on improving population health management, are anticipated to drive the market further toward growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global healthcare predictive analytics market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on product, deployment mode, application and end user.

Breakup by Product:

- Hardware
- Software and Services

Breakup by Deployment Mode:

- On-premises
- Cloud-based

Breakup by Application:

- Clinical Data Analytics
- Financial Data Analytics
- Research Data Analytics
- Operations Management
- Others

Breakup by End User:

Healthcare Payer
Healthcare Provider
Others

Breakup by Region:

North America
United States
Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Allscripts Healthcare Solutions Inc., Cerner Corporation, IBM Corporation, McKesson Corporation, MedeAnalytics Inc., Microsoft Corporation, Oracle Corporation, SAS Institute Inc., UnitedHealth Group Incorporated

and Verisk Analytics.

Key Questions Answered in This Report

1. What was the size of the global healthcare predictive analytics market in 2023?
2. What is the expected growth rate of the global healthcare predictive analytics market during 2024-2032?
3. What has been the impact of COVID-19 on the global healthcare predictive analytics market?
4. What are the key factors driving the global healthcare predictive analytics market?
5. What is the breakup of the global healthcare predictive analytics market based on the product?
6. What is the breakup of the global healthcare predictive analytics market based on the deployment mode?
7. What is the breakup of the global healthcare predictive analytics market based on the application?
8. What is the breakup of the global healthcare predictive analytics market based on the end user?
9. What are the key regions in the global healthcare predictive analytics market?
10. Who are the key players/companies in the global healthcare predictive analytics market?
