Abstracts

The global home care packaging market size reached US\$ 96.2 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 126.7 Billion by 2028, exhibiting a growth rate (CAGR) of 4.7% during 2022-2028.

Home care packaging is manufactured using durable materials to safeguard and protect the contents from microbial contamination and maintain their overall quality. It also ensures effective usage and maximum efficiency and provides convenience and security during the storage and transportation of products. It is available in different sizes, colors, ranges and material types depending on the product type. At present, home care packaging is widely utilized to build brand image.

Home Care Packaging Market Trends:

Rapid urbanization, improving living standards and the increasing awareness about the overall health and wellbeing are among the key factors escalating the demand for home care products across the globe. Moreover, the rising adoption of compact packages on account of their affordability and ease of usage and storage is impelling the growth of the market. Apart from this, a significant shift in consumer preferences towards flexible packaging, along with the increasing focus on consumer-oriented packaging production, is bolstering the market growth. Furthermore, with the growing environmental concerns, governing agencies of several countries are providing tax exemptions to companies adopting innovative and sustainable ways of manufacturing products. This is encouraging these companies to use recycled plastics and offer refill pouches to reduce

the ecological footprint. Besides this, they are utilizing advanced technologies, such as artificial intelligence (AI), near field communication (NFC) and radio frequency identification (RFID), to improve smart packaging services such as preventing counterfeit, providing accurate information about inventory tracking and allowing consumers to track goods using smartphones.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global home care packaging market report, along with forecasts at the global, regional and country levels from 2023-2028. Our report has categorized the market based on product, material type and packaging type.
