The global HVAC equipment market size reached US\$ 209.7 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 292.4 Billion by 2028, exhibiting a growth rate (CAGR) of 5.4% during 2023-2028.

Heating, ventilation, and air conditioning (HVAC) equipment is used to provide environmental comfort to occupants and allow appropriate air quantity in vehicles and homes. It includes heating, cooling, and hybrid split, duct-free, and packaged heating and air conditioning systems. It helps improve the air quality of an enclosed space and introducing conditioned air. It also helps replenish oxygen and remove moisture, smoke, dust, bacteria, and unwanted pollutants. Besides this, it is environment-friendly and saves construction space, installation time and cost, and minimizes power usage. As a result, HVAC equipment is extensively used in numerous industry verticals across the globe.

HVAC Equipment Market Trends:

Rapid urbanization and the growing global population are resulting in the increasing construction of residential and commercial buildings, which are equipped with HVAC equipment. In addition, the expansion of hotels, restaurants, shopping malls, and movie theaters is catalyzing the demand for HVAC equipment as they help maintain a consistent temperature. Sudden changes in climate and rising temperature are significantly impacting energy consumption and air conditioning loads of buildings. This, in turn, is driving the demand for HVAC equipment. Apart from this, the increasing use of technologically advanced and energy-efficient variants of HVAC equipment is strengthening the market growth. Additionally, the rising focus of leading manufacturers on retaining their market position through partnership, acquisition and business

expansion is creating a positive market outlook. Furthermore, governments of various countries are implementing various initiatives to encourage individuals to use energy-efficient HVAC devices in their homes and workplaces. They are also increasing their spending capacity on sustainable building development, which is expected to propel the market growth in the coming years.
