Abstracts

The global hypercholesterolemia market size reached US\$ 17.7 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 58.2 Billion by 2032, exhibiting a growth rate (CAGR) of 13.74% during 2024-2032. Rising health consciousness, increasing geriatric population, and extensive research and development (R&D) activities represent some of the key factors driving the market growth.

Hypercholesterolemia is a lipid disorder known for an excess of low-density lipoprotein (LDL) in the blood. Some of the common conditions that lead to hypercholesterolemia are diabetes, polycystic ovary syndrome, underactive thyroid gland, and kidney diseases. It is a long-term condition, and chest pain, shortness of breath, extreme fatigue, and muscle weakness are some of the most common symptoms.

Hypercholesterolemia is a serious life-threatening ailment wherein drugs are used to decrease the level of bad cholesterol in the blood while reducing the liver's production of harmful cholesterol. These drugs help stabilize the plaques on blood vessel walls and reduce the risk of certain blood clots. They also reduce the risk of a heart attack or stroke and dysfunction in the blood vessels.

Hypercholesterolemia Market Trends:

The growing prevalence of hypercholesterolemia due to the rising unhealthy lifestyle among the masses is one of the key factors driving the market growth. In line with this,

the increasing geriatric population that is susceptible to cardiovascular disorders (CVDs) and various other chronic diseases, such as diabetes, kidney complications, and thyroid problems, is favoring the market growth. Moreover, the rising health consciousness and the increasing awareness regarding the available treatment alternatives for hypercholesterolemia are acting as other growth-inducing factors. Along with this, the introduction of various drugs and therapies to achieve near-normal lipid profiles in hypercholesterolemia patients and reduce the risk of CVDs occurrence in patients is providing a considerable boost to the market growth. Apart from this, the development of novel drug classes with enhanced efficacy and safety profile is providing an impetus to the market growth. Additionally, the launch of various combination therapies with other cholesterol-diminishing compounds to treat hypercholesterolemia is positively influencing the market growth. Besides this, the widespread adoption of statins due to their several advantages, such as enhanced endothelial function, decreased oxidative stress-induced cell damage, increased atherosclerotic plaque stability, and reduced inflammation is facilitating the market growth. Other factors, including overall improvements in the healthcare infrastructure, extensive research, and development (R&D) activities for developing novel drugs, and the increasing number of familial hypercholesterolemia patients, are anticipated to drive the market growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global hypercholesterolemia market, along with forecasts at the global, regional, and country level from 2024-2032. Our report has categorized the market based on type, diagnosis and treatment, patient, and end user.

Type Insights:

- Type 1
- Type 2A
- Type 2B
- Type 3
- Type 4
- Type 5
- Others

The report has provided a detailed breakup and analysis of the hypercholesterolemia market based on the type. This includes type 1, 2A, 2B, 3, 4, 5 and others.

Diagnosis and Treatment Insights:

- Diagnosis
 - Cholesterol Test
 - Genetic Testing
- Treatment
 - Statins
 - Niacin
 - Bile Acid Resins
 - Fibric Acid Derivatives
 - Cholesterol Absorption Inhibitors
 - PCSK9 Inhibitors
 - Others

The report has provided a detailed breakup and analysis of the hypercholesterolemia market based on the diagnosis and treatment. This includes diagnosis (cholesterol test and genetic testing) and treatment (statins, niacin, bile acid resins, fibric acid derivatives, cholesterol absorption inhibitors, PCSK9 inhibitors and others).

Patient Insights:

- Pediatric
- Adults
- Geriatric

The report has provided a detailed breakup and analysis of the hypercholesterolemia market based on the patient. This includes pediatric, adults, and geriatric.

End User Insights:

- Hospitals
- Specialty Clinics
- Home Healthcare
- Others

The report has provided a detailed breakup and analysis of the hypercholesterolemia market based on the end user. This includes hospitals, specialty clinics, home healthcare and others. According to the report, hospitals represented the largest segment.

Regional Insights:
