Abstracts

The 7 major impetigo markets are expected to exhibit a CAGR of 4.7% during 2024-2034.

The impetigo market has been comprehensively analyzed in IMARC's new report titled "Impetigo Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Impetigo refers to a highly contagious bacterial skin infection that causes red sores on various parts of the body. It is mostly common in children between the ages of 2 and 6 but can also occur at any age. This condition mainly develops when bacteria enter the body via a break in the skin, including a cut or insect bite. The symptoms of impetigo typically begin with a small red spot that quickly forms into a blister. The blister will eventually burst and form a yellow-brown crust. Impetigo lesions are often found on the face, particularly around the nose and mouth, but can also occur on other parts of the body. Additionally, individuals suffering from this ailment may experience itchiness in the affected area, along with soreness that may be tender or painful to touch. The diagnosis of impetigo includes a comprehensive evaluation that considers the patient's medical history and physical indications. A skin swab for culture and sensitivity is also recommended among individuals to look for and identify harmful germs that cause the disease. In rare cases, the healthcare provider may perform a biopsy to validate the diagnosis.

The increasing prevalence of irritated skin disorders, which enhance the likelihood of bacterial growth in the superficial layers of the epidermis, is primarily driving the impetigo market. In addition to this, the rising incidences of several associated risk factors, including weakened immune systems, crowded living conditions, poor hygiene practices, warm and humid weather, etc., are also bolstering the market growth.

Furthermore, the widespread adoption of topical antibiotics, such as fusidic acid and mupirocin, for treating the disease more effectively and with limited toxicity as compared to oral pharmacological agents is acting as another significant growth-inducing factor. Additionally, the escalating demand for waterproof occlusive dressings to improve wound recovery and prevent any further damage to the affected site is also creating a positive outlook for the market. Apart from this, the emerging popularity of AI-equipped diagnostic tools, since they can analyze large volumes of data to discover patterns and predict outbreaks of the ailment in order to identify proactive actions aimed at avoiding its spread, is expected to drive the impetigo market in the coming years.

IMARC Group's new report provides an exhaustive analysis of the impetigo market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for impetigo and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the impetigo market in any manner.

*Kindly note that the drugs in the above table only represent a partial list of marketed/pipeline drugs, and the complete list has been provided in the report.

Key Questions Answered in this Report:

Market Insights

How has the impetigo market performed so far and how will it perform in the coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the impetigo market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the impetigo market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of impetigo across the seven major markets?

What is the number of prevalent cases (2018-2034) of impetigo by age across the seven major markets?

What is the number of prevalent cases (2018-2034) of impetigo by gender across the seven major markets?

How many patients are diagnosed (2018-2034) with impetigo across the seven major markets?

What is the size of the impetigo patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of impetigo?

What will be the growth rate of patients across the seven major markets?

Impetigo: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for impetigo drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the impetigo market?

What are the key regulatory events related to the impetigo market?

What is the structure of clinical trial landscape by status related to the impetigo market?

What is the structure of clinical trial landscape by phase related to the impetigo market?

What is the structure of clinical trial landscape by route of administration related to the

impetigo market?

2 SCOPE AND METHODOLOGY

- 2.1 Objectives of the Study
- 2.2 Stakeholders
- 2.3 Data Sources
 - 2.3.1 Primary Sources
 - 2.3.2 Secondary Sources
- 2.4 Market Estimation
 - 2.4.1 Bottom-Up Approach
 - 2.4.2 Top-Down Approach
- 2.5 Forecasting Methodology

3 EXECUTIVE SUMMARY

4 IMPETIGO - INTRODUCTION

- 4.1 Overview
- 4.2 Regulatory Process
- 4.3 Epidemiology (2018-2023) and Forecast (2024-2034)
- 4.4 Market Overview (2018-2023) and Forecast (2024-2034)
- 4.5 Competitive Intelligence

5 IMPETIGO - DISEASE OVERVIEW

- 5.1 Introduction
- 5.2 Symptoms and Diagnosis
- 5.3 Pathophysiology
- 5.4 Causes and Risk Factors
- 5.5 Treatment

6 PATIENT JOURNEY

7 IMPETIGO - EPIDEMIOLOGY AND PATIENT POPULATION

- 7.1 Epidemiology - Key Insights

- 7.2 Epidemiology Scenario - Top 7 Markets
 - 7.2.1 Epidemiology Scenario (2018-2023)
 - 7.2.2 Epidemiology Forecast (2024-2034)
 - 7.2.3 Epidemiology by Age (2018-2034)
 - 7.2.4 Epidemiology by Gender (2018-2034)
 - 7.2.5 Diagnosed Cases (2018-2034)

12 IMPETIGO - PIPELINE DRUGS

12.1 List of Impetigo Pipeline Drugs Across the Top 7 Markets

12.1.1 Drug Name – Company Name

12.1.1.1 Drug Overview

12.1.1.2 Mechanism of Action

12.1.1.3 Clinical Trial Results

12.1.1.4 Safety and Efficacy

12.1.1.5 Regulatory Status

Kindly note that the complete list of pipeline drugs has been provided in the report.

13. IMPETIGO - ATTRIBUTE ANALYSIS OF KEY MARKETED AND PIPELINE DRUGS

14. IMPETIGO – CLINICAL TRIAL LANDSCAPE

14.1 Drugs by Status

14.2 Drugs by Phase

14.3 Drugs by Route of Administration

14.4 Key Regulatory Events

15 IMPETIGO - MARKET SCENARIO

15.1 Market Scenario - Key Insights

15.2 Market Scenario - Top 7 Markets

15.2.1 Impetigo - Market Size

15.2.1.1 Market Size (2018-2023)

15.2.1.2 Market Forecast (2024-2034)

15.2.2 Impetigo - Market Size by Therapies

15.2.2.1 Market Size by Therapies (2018-2023)

15.2.2.2 Market Forecast by Therapies (2024-2034)

15.3 Market Scenario - United States

15.3.1 Impetigo - Market Size

15.3.1.1 Market Size (2018-2023)

15.3.1.2 Market Forecast (2024-2034)

15.3.2 Impetigo - Market Size by Therapies

15.3.2.1 Market Size by Therapies (2018-2023)

15.3.2.2 Market Forecast by Therapies (2024-2034)
