Abstracts

The global in-app purchase market size reached US\$ 124.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 347.0 Billion by 2028, exhibiting a growth rate (CAGR) of 16.55% during 2023-2028.

In-app purchase refers to the purchase of additional services and features or functions in an application on computers, tablets and smartphones. It offer access to additional content and features, including subscriptions, digital goods and premium content, directly within the application. In-app purchases are commonly available in replenishable, auto-renewing subscription, non-replenishable and subscription-based variants. It enables the application developers to provide basic content free of charge and monetize specialized features of the product. It also provides access to promotions and aids in enhancing brand awareness and download rates. As a result, in-app purchases are widely used across health and fitness, gaming, education and learning, entertainment and music, travel and hospitality applications.

In-App Purchase Market Trends:

The increasing demand for smartphones across the globe is one of the key factors driving the growth of the market. In-app purchases are primarily made through smartphone-based applications to gain access to premium content and application features. Additionally, the widespread product adoption in health and fitness applications due to the rising health consciousness among the masses is favoring the market growth. The users can purchase access to trainers, customized diet plans, regular health checks and discounted products through in-app purchases. Moreover, the integration of digital wallets for in-app purchases is providing a thrust to the market growth. These online payment solutions are highly convenient, secure and aid in

making the payment process smoother and faster. In line with this, the increasing product demand in gaming applications for purchasing speed upgrades, hints and additional cosmetic items for characters is positively impacting the market growth. Other factors, including the increasing penetration of high-speed internet, along with the increasing expenditure capacities of the consumers, are anticipated to drive the market toward growth.
