## **Abstracts**

The Indian ayurvedic products market size reached INR 748.5 Billion in 2023. Looking forward, IMARC Group expects the market to reach INR 3,207.6 Billion by 2032, exhibiting a growth rate (CAGR) of 17% during 2024-2032. The increasing prevalence of medical disorders, rising health consciousness among consumers, and the easy availability of ayurvedic products through online and offline distribution channels represent some of the key factors driving the market.

Ayurvedic products refer to traditional herbal and natural products based on the traditional Indian system of medicine. They include herbal supplements, teas, oils, and powders made from natural ingredients, such as herbs, spices, roots, and fruits. They promote health and overall well-being by restoring balance to the body and mind and are used to treat various health concerns, such as digestive issues, stress, sleep problems, and skin problems. As they are made from natural ingredients, they have fewer side effects than pharmaceutical drugs and synthetic chemicals. At present, key market players are introducing ayurvedic products according to individual needs and constituent types in India.

### **India Ayurvedic Products Market Trends:**

Rising health concerns due to the side effects of western drugs and the growing awareness about the benefits of natural and organic medicines represent one of the key factors bolstering the market growth in India. In addition, the increasing popularity of ayurvedic products as a safe and healthy alternative to synthetic chemicals and pharmaceuticals is propelling the market growth in the country. Apart from this, the easy

availability of ayurvedic products through online and offline distribution channels, coupled with the increasing affordability and easy accessibility of products across both urban and rural regions of the country are fueling the market growth. Moreover, the Government of India (GOI) is undertaking favorable initiatives to support the ayurvedic product industry. For this, the government is organizing exhibitions, trade fairs, and roadshows for the promotion of ayurveda. The government is also investing in different programs to increase the visibility, acceptability, and usage of ayurvedic products in the health system. This, along with the increasing investments in various research and development (R&D) activities for developing new formulations, improving manufacturing processes, and incorporating modern technology into ayurvedic product development is creating a favorable market outlook. Besides this, various strategies to globalize and promote ayurveda with the health system and the increasing number of visitors coming to India to seek ayurvedic treatments and products are offering lucrative growth opportunities to ayurvedic product manufacturers. Other factors, such as changing dietary patterns, increasing prevalence of lifestyle diseases, such as diabetes, obesity, and hypertension, and various incentives and subsidies provided to drug manufacturers and entrepreneurs, are projected to stimulate the growth of the in the country.
