The India tyre market size reached 188.9 Million Units in 2022. Looking forward, IMARC Group expects the market to reach 225.6 Million Units by 2028, exhibiting a growth rate (CAGR) of 3.1% during 2023-2028.

India represents the fourth largest market for tyres in the world after China, Europe and the United States. In India, the market is currently being driven by the increasing radialization of tyres, especially in buses and trucks. Moreover, the tyre industry consists of a vast consumer base; they are used in all types of vehicles which include passenger cars, buses, military vehicles, motorcycles, trucks, etc. The demand for tyres is primarily catalyzed from two end-user segments - OEMs and the replacement segment. The replacement market currently dominates the tyre market accounting for most of the total sales. Demand by the OEM segment is driven by new automobile sales trends, whereas the replacement market is linked to the usage patterns and replacement cycles. The market for tyres is quite concentrated in India, with the top 10 manufacturers accounting for around 80 percent of the total market share. MRF, Apollo Tyres and JK Tyres currently represent the top players in this market.
