Abstracts

The Indian animal husbandry market size reached INR 1,167.2 Billion in 2023. Looking forward, IMARC Group expects the market to reach INR 2,117.1 Billion by 2032, exhibiting a growth rate (CAGR) of 6.6% during 2024-2032.

Animal husbandry is the agricultural practice of selective breeding and raising livestock, such as cattle, dogs, sheep, and horses. It includes the management and care of animals wherein the genetic qualities and regular behavior of animals are further developed for profit. It helps in the proper administration of animals by providing adequate food, shelter, and protection against diseases to domestic animals. It helps develop high-yielding breeds of animals by crossbreeding and strengthens the production of various food products, such as milk, eggs, and meat. Besides this, as it involves the proper disposal of animal waste, promotes a healthy environment, and provides employment to many farmers, there is an increase in the uptake of animal husbandry across India.

Indian Animal Husbandry Market Trends:

The growing population and the rising consumption of meat and dairy products in India are among the key factors positively influencing the market. In addition, shifting consumer preferences for non-vegetarian food products are promoting the adoption of animal husbandry in the country. Apart from this, the rising occurrence of zoonotic diseases is a major challenge for healthcare practitioners, which, in turn, is creating a positive outlook for the market in India. Factors responsible for the rapid spread of

zoonotic diseases are demographic changes, land encroachment, and agricultural practices. This, along with the increasing number of animal lovers and activists fighting for animal rights, animal abuse, and illegal slaughtering of animals, is supporting the animal husbandry market. The rapid expansion of retail and hospital pharmacies providing veterinary drugs, nutritional supplements, and pet vaccines is contributing to the effective treatment of various diseases and injuries in animals effectively. Furthermore, the expansion of e-commerce channels and online pharmacies in India is offering lucrative growth opportunities to animal husbandry market players. There is a significant surge in demand for animal medicines and other healthcare products for livestock from online pharmacies as they offer exciting deals and discounts, easy availability of products, free doorstep delivery, and ease of payment. Moreover, the increasing investment by the Government of India (GoI) to support animal breeders and promote awareness about animal health is propelling the market growth in the country.
