Abstracts

The Indonesia cigarette lighter market size reached US\$ 81.2 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 93.1 Million by 2028, exhibiting a growth rate (CAGR) of 2.31% during 2022-2028. Rising smoking population, the increasing consumer disposable income, the influence of advertising and promotional activities by lighter manufacturers and tobacco companies, surging popularity of smoking among young adults, and the expansion of distribution channels represent some of the key factors driving the market.

A cigarette lighter is a compact, convenient, and handy device that helps users ignite cigarettes, candles, and other combustible materials. It is made from a combination of metal and plastic and is manufactured using precise techniques to ensure reliability and longevity. The process typically involves molding the plastic components, assembling them with the metal parts, and installing the ignition mechanism. The advantages of cigarette lighters are plentiful, such as portability and a consistent flame that can withstand windy conditions. Furthermore, modern cigarette lighters often feature safety mechanisms, such as child-resistant locks or auto-extinguishing capabilities, minimizing the risk of accidents. Currently, the most common product variants include disposable butane, refillable, and novelty lighters.

Indonesia Cigarette Lighter Market Trends:

The Indonesia cigarette lighter market is augmented by several key factors, including the growing smoking population and the affordability and availability of cigarette lighters. Furthermore, the increasing disposable income and the influence of advertising and promotional activities by lighter manufacturers and tobacco companies are driving the market growth. Moreover, the expansion of distribution channels, such as convenience stores and online platforms, the rising popularity of smoking among young adults, and the social acceptance of smoking in certain communities are providing an impetus to the market growth. Furthermore, the prevalence of outdoor activities and the need for portable lighters are contributing to the market growth. In line with this, the introduction of innovative and technologically advanced lighters, including windproof and electric models, and the cultural significance of smoking are creating a positive outlook for the market. Other factors, such as the growth of the hospitality and tourism industry in the country, the influence of peer pressure and social norms, and the availability of a wide range of lighter designs and customization options, are influencing the market growth.
