Abstracts

The global industrial agitators market reached a value of US\$ 1.9 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 2.5 Billion by 2027, exhibiting a CAGR of 4.7% during 2022-2027. Keeping in mind the uncertainties of COVID-19, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use industries. These insights are included in the report as a major market contributor.

Industrial agitators are rotating machines that mix and homogenize different types of products with equal phases by creating a flow between liquids and solids. They are utilized in various industry verticals for heat transfer, suspension, emulsification, high viscosity blending, and gas dispersion. Nowadays, several manufacturers are offering a comprehensive range of high-efficiency advanced industrial agitators. These agitators provide high-speed solutions to easily transform raw materials into the desired product of stainless steel, plastic, or fiberglass reinforced plastics (FRP) tanks.

Industrial Agitators Market Trends:

The extensive use of industrial agitators in different sectors represents one of the major factors bolstering the market growth. For instance, they are employed in the pharmaceutical industry to improve the overall performance and reduce the production cost of medicines. Additionally, the growing prevalence of chronic diseases is influencing the market positively. Moreover, the escalating demand for ready-to-eat (RTE) food products is increasing the utilization of industrial agitators in the food and beverage (F&B) industry worldwide. They are also used in water and wastewater management, wherein they perform coagulation and mixing, solids suspension, dissolution, destratification and recirculation, and flocculation. Furthermore, the growing

focus of governing agencies on upgrading existing wastewater treatment plants is also contributing to the market growth. Apart from this, the rising popularity of biodiesel is fueling the use of industrial agitators in the oil and gas industry for mixing petrochemicals. In line with this, due to rising environmental concerns and increasing energy conservation initiatives, governments of several countries are supporting the utilization of biodiesel in vehicles, power generation, and residential and commercial heating. This is anticipated to create a positive outlook for the market.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global industrial agitators market, along with forecasts at the global, regional and country level from 2022-2027. Our report has categorized the market based on type, mounting type, distribution channel and industry vertical.

Breakup by Type:

- Industrial Stirrer
- Paint Mixers
- High Speed Stirrers
- Chemical Agitators
- Others

Breakup by Mounting Type:

- Top-mounted
- Side-mounted
- Bottom-mounted

Breakup by Distribution Channel:

- Online
- Offline

Breakup by Industry Vertical:

- Chemicals and Paints
- Material and Construction
- Food and Beverages
- Pharmaceutical

Consumer Goods
Others

Breakup by Region:

North America
United States
Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Dynamix Agitators Inc., EKATO Holding GmbH, Mixer Direct, NOV Inc., Silverson, SPX FLOW Inc., Statiflo International Ltd., Sulzer Ltd, TACMINA CORPORATION and Xylem Inc.

Key Questions Answered in This Report:

How has the global industrial agitators market performed so far and how will it perform in the coming years?

What has been the impact of COVID-19 on the global industrial agitators market?

What are the key regional markets?

What is the breakup of the market based on the type?

What is the breakup of the market based on the mounting type?

What is the breakup of the market based on the distribution channel?

What is the breakup of the market based on the industry vertical?

What are the various stages in the value chain of the industry?

What are the key driving factors and challenges in the industry?

What is the structure of the global industrial agitators market and who are the key players?

What is the degree of competition in the industry?
