Market Overview:

The global industrial and commercial LED lighting market size reached US\$ 43.6 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 93.2 Billion by 2028, exhibiting a growth rate (CAGR) of 12.2% during 2023-2028.

Light-emitting diode (LED) lights are semiconductor devices that emit infrared or visible light. They are highly energy efficient as LED lights produce less waste and more useful lumens compared to other lighting technologies. They are considered environment-friendly lighting solutions as the production of LEDs does not require the utilization of mercury. In addition, they offer several advantages, such as high durability, long shelf life, low voltage operations, various dimming features, and design flexibility. As LED lights are highly efficient in cold temperatures, they are widely used in the industrial and commercial sectors worldwide.

Industrial and Commercial LED Lighting Market Trends:

At present, there is a rise in the demand for cost-effective lighting solutions in large and small enterprises across the globe. This, along with the growing utilization of industrial and commercial LED lighting in large screen displays, represents one of the key factors driving the market. Besides this, various benefits offered by industrial and commercial LED lighting in the hospitality sector, such as high durability, extended shelf-life, and less energy waste, are contributing to the growth of the market. Moreover, governments of several countries are undertaking initiatives to promote the use of LED lighting in the industrial and commercial sectors for minimizing power dissipation, which is propelling the growth of the market. In addition, there is an increase in the utilization of smart

lighting in various organizations to adjust the amount of light using control zones. This, coupled with the growing number of warehouse facilities around the world, is positively influencing the market. Apart from this, the escalating demand for industrial and commercial LED lights in warehouse facilities to enhance productivity and ensure safe working conditions for workers is creating a positive market outlook. Additionally, the rising employment of industrial and commercial LED lighting to illuminate building structures, digital signage, statues, landscapes, and columns is offering lucrative growth opportunities to industry investors.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global industrial and commercial LED lighting market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on product type, application, distribution channel and end user.

Breakup by Product Type:

- LED Lamps
- LED Fixtures

Breakup by Application:

- Indoor Lighting
- Outdoor Lighting

Breakup by Distribution Channel:

- Direct Sales
- Online Stores
- Specialty Stores
- Others

Breakup by End User:

- Industrial
- Commercial

Breakup by Region:

North America
United States
Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Acuity Brands lighting Inc., ams-OSRAM AG, Cree Lighting (Ideal Industries Inc.), Dialight plc, Eaton Corporation plc, Emerson Electric Co., Litetronics International Inc., Schneider Electric SE, Signify N.V., Syska Hennessy Group and Zumtobel Group.

Key Questions Answered in This Report

1. What was the size of the global industrial and commercial LED lighting market in 2022?
2. What is the expected growth rate of the global industrial and commercial LED lighting market during 2023-2028?
3. What are the key factors driving the global industrial and commercial LED lighting

market?

4. What has been the impact of COVID-19 on the global industrial and commercial LED lighting market?
5. What is the breakup of the global industrial and commercial LED lighting market based on the product type?
6. What is the breakup of the global industrial and commercial LED lighting market based on the application?
7. What are the key regions in the global industrial and commercial LED lighting market?
8. Who are the key players/companies in the global industrial and commercial LED lighting market?
