Abstracts

The global industrial X-ray inspection equipment and imaging software market size reached US\$ 759.8 Million in 2023. Looking forward, IMARC Group expects the market to reach US\$ 1,301.6 Million by 2032, exhibiting a growth rate (CAGR) of 6% during 2024-2032.

Industrial x-ray inspection equipment and imaging software are used to perform non-destructive testing (NDT) for uncovering subsurface defects in various industrial products. The x-ray inspection equipment aids in detecting hidden inconsistencies, flaws, cracks, and voids in a wide array of solid materials, such as plastic, rubber, silicone, metal, and composites, without harming the test item. On the other hand, the imaging software produces a clear image of the inspected location for evaluation by NDT inspectors and to maintain a record of the internal condition of the test piece. In recent years, industrial x-ray inspection equipment and imaging software have gained traction in manufacturing facilities for quality control and risk management.

Industrial X-ray Inspection Equipment and Imaging Software Market Trends:
Industrial x-ray inspection equipment and imaging software assist in enhancing the

production quality, determining the soundness of products or materials, and verifying the integrity of the internal structure. As a result, their emerging applications across various end use industries, including oil and gas, semiconductor and electronics, aerospace, automotive, construction, and food and beverage, represents the primary factor driving the market growth. Besides this, the escalating demand for compact devices and the emerging trend of electronics miniaturization are augmenting the product demand for detailed inspection and quality analysis. Additionally, the leading players are developing next-gen digital radiography (DR) machines integrated with flat-panel detectors (FPDs) to offer higher resolution and faster processing. This, in confluence with the introduction of computer tomography (CT) equipped with FPDs and other innovative technologies, is catalyzing the market growth. Furthermore, the growing consumer demand for high-quality products and the increasing number of semiconductor fabrication plants are accelerating the product adoption rates. Other factors, including the rising oil and gas exploration activities, favorable government initiatives, stringent safety and quality standards, and ongoing research and development activities, are also creating a positive market outlook.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global industrial X-ray inspection equipment and imaging software market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on image type, technology, offering and end use industry.

Breakup by Image Type:

- 2D
- 3D
- 4D

Breakup by Technology:

- Film-Based Imaging
- Digital Imaging
- Computed Tomography
- Computed Radiography
- Direct Radiography

Breakup by Offering:

Equipment
Software

Breakup by End Use Industry:

Oil and Gas
Aerospace
Food Industry and Construction
Automotive and Manufacturing
Energy and Power
Semiconductor and Electronics
Others

Breakup by Region:

North America
United States
Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Carestream Health, D?RR NDT GmbH & Co. KG, General Electric Company, Hamamatsu Photonics K.K., Hitachi Ltd., Nikon Corporation, North Star Imaging Inc. (Illinois Tool Works Inc.), Olympus Corporation, OMRON Corporation, Rigaku Corporation, Teledyne Technologies Inc, Thermo Fisher Scientific Inc. and YXLON International (Comet Holding).

Key Questions Answered in This Report

1. What was the size of the global industrial X-ray inspection equipment and imaging software market in 2023?
2. What is the expected growth rate of the global industrial X-ray inspection equipment and imaging software market during 2024-2032?
3. What has been the impact of COVID-19 on the global industrial X-ray inspection equipment and imaging software market?
4. What are the key factors driving the global industrial X-ray inspection equipment and imaging software market?
5. What is the breakup of the global industrial X-ray inspection equipment and imaging software market based on the technology?
6. What is the breakup of the global industrial X-ray inspection equipment and imaging software market based on the end use industry?
7. What are the key regions in the global industrial X-ray inspection equipment and imaging software market?
8. Who are the key players/companies in the global industrial X-ray inspection equipment and imaging software market?
