Abstracts

The global intake filter media market size reached US\$ 5.8 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 7.9 Billion by 2032, exhibiting a growth rate (CAGR) of 3.4% during 2024-2032.

Intake filter media is a component of an air filter that prevents atmospheric dust particles from depositing on the internal parts of a machine. These particles usually deposit on the valves, rotors, vanes, or impellers of turbines, engines, centrifugal fans, and blowers. Intake filter media assists in preventing premature mechanical wear and tear and oil contamination in the engine. As it is washable, reusable, easy to install, and exhibits high mechanical strength and considerable dirt holding capacity, its demand is increasing around the world.

Intake Filter Media Market Trends:

The increasing utilization of air filters equipped with superior intake filter media in engines represents one of the key factors propelling the growth of the market. Intake filter media removes fine dust particles and provides cleaner air to engines, which is required for improving combustion and lowering emissions. Besides this, the growing adoption of air filters in automobiles on account of strict government regulations to reduce the release of pollutants and harmful greenhouse gas (GHG) emissions into the atmosphere is favorably influencing the sales of intake filter media around the world. Additionally, the increasing application of intake filter media in the aerospace and

marine industries is strengthening the growth of the market. Furthermore, the rising utilization of advanced filter materials with electrostatic interactions is improving the efficiency of intake filter media. Moreover, the advent of nanofiber filter media is improving the overall dust separation efficiency, reducing flow control and extending service life, which is anticipated to fuel the market growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global intake filter media market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on filter media, mode, application and distribution channel.

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Ahlstrom-Munksj?, Brackett Aero Filters Inc., Cummins Inc., Denso Corporation, Donaldson Company Inc., Freudenberg & Co. KG, General Motors Company, Hengst SE, K&N Engineering Inc., Mahle GmbH, Parker Hannifin Corp, Porvair Filtration Group (Porvair plc), Sogefi SpA and Toyota Boshoku Corporation.

Key Questions Answered in This Report

1. How big is the global intake filter media market?
2. What is the expected growth rate of the global intake filter media market during 2024-2032?
3. What are the key factors driving the global intake filter media market?
4. What has been the impact of COVID-19 on the global intake filter media market?
5. What is the breakup of the global intake filter media market based on the filter media?

6. What is the breakup of the global intake filter media market based on the mode?
7. What is the breakup of the global intake filter media market based on the application?
8. What is the breakup of the global intake filter media market based on the distribution channel?
9. What are the key regions in the global intake filter media market?
10. Who are the key players/companies in the global intake filter media market?
