Abstracts

The global K-12 online tutoring market size reached US\$ 5.3 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 17.6 Billion by 2032, exhibiting a growth rate (CAGR) of 13.9% during 2024-2032. Rising sales of smart devices, the emerging trend of microlearning, and the integration of advanced technologies represent some of the key factors driving the market.

K-12 online tutoring provides microlearning facilities via videos, audio, infographics, and text. It offers an easy way of learning for students of kindergarten to grade 12 and strengthens communication with teachers. It enables students to choose from various courses and tutors to accommodate their learning needs and style. It also provides personalized learning flexibility and convenience to students. At present, K-12 online tutoring is gaining traction across the globe as it provides a quick way of learning, supports teacher-parent interactive sessions, and focuses on skill development. Besides this, there is an increase in the need for advanced learning methods as traditional learning methods is currently considered ineffective on account of their excessive reliance on listening, reading, and observing.

K-12 Online Tutoring Market Trends:

Rapid digitization, increasing sales of smart devices like smartphones, tablets, and laptops, and the rising penetration of high-speed internet connectivity are among the major factors driving the demand for K-12 online tutoring around the world. Moreover, the growing awareness about the benefits and the expanding number of applications

and websites that are offering K-12 online tutoring services is influencing the market positively. In addition, the integration of artificial intelligence (AI), machine learning (ML), the internet of things (IoT), virtual reality (VR), and augmented reality (AR) with these services is facilitating the growth of the market. Furthermore, the increasing adoption of Science, Technology, Engineering, and Mathematics (STEM) education on account of the rising number of competitive exams for higher education is favoring the market growth. Apart from this, key players are offering K-12 online tutoring services to learn foreign languages for various purposes. This, coupled with the emerging trend of studying overseas to shape careers, is contributing to the market growth. Besides this, the growing demand for quality education with a modern and interactive approach is resulting in the widespread adoption of game-based learning techniques in K-12 online tutoring. Additionally, rapid urbanization, the emerging trend of microlearning, and the growing preference for personalized and adaptive microlearning for concise and relevant content that addresses the knowledge gap in students are some of the other factors creating a positive outlook for the market.
