Abstracts

The global kids trolley bags market size reached US\$ 491.0 Million in 2023. Looking forward, IMARC Group expects the market to reach US\$ 958.3 Million by 2032, exhibiting a growth rate (CAGR) of 7.48% during 2024-2032. The expanding tourism industry, rising expenditure capacities of consumers and various product innovations represent some of the key factors driving the market.

Kids trolley bags are luggage wheeled containers designed for kids to carry essentials during trips. They are manufactured using leather, wood, metal, plastic, fiber composites, and recycled materials. They consist of a handle and wheels, allowing children to easily pull the bag. Kids trolley bags are widely used for school trips, sleepovers, vacations, and trips to visit family or friends, as they provide a convenient way for children to carry their belongings, such as clothes, toiletries, and accessories. These bags are comfortable and easy to carry for kids due to their wheeled mechanism. Kids trolley bags are lightweight, sturdy, convenient, and flexible and exhibit water, stain, scratch, ultraviolet (UV) rays wear and tear resistance.

Kids Trolley Bags Market Trends:

The expanding tourism industry across the globe is one of the key factors driving the market growth. Kids trolley bags are widely used due to the increasing affordable travel and growing popularity of family vacations with kids. In line with this, the widespread product adoption owing to the rising inclination of parents to make children more independent by giving them a sense of responsibility for their belongings is favoring the market growth. Apart from this, the increasing expenditure capacities of consumers on

premium and luxury travel bags due to the ever-changing trends is acting as a growth-inducing factor. Additionally, the introduction of kid's trolley bags manufactured of durable materials that can withstand the wear and tear of travel and everyday use is providing an impetus to the market growth. Moreover, consumers are increasingly adopting trolley bags made using eco-friendly materials, organic and natural fabric dyes, and recycled leather, which, in turn, is propelling the market growth. Besides this, the launch of kid's trolley bags with gender preference in color combinations and the introduction of fun designs and cartoon characters, such as Disney princess, mickey mouse, avengers' collection, and car racing trolley bags, are positively influencing the market growth. Furthermore, the integration of a global positioning system (GPS) device with a built-in SIM card, which uses cellular networks to transmit the bag's location to the parent's smartphone, is facilitating the market growth. Other factors, including aggressive promotional activities by leading brands, the launch of visually appealing and creative designs, the easy product availability across e-commerce platforms, the introduction of a ride-on feature, and an increasing demand for ultra-light trolley bags, are creating a positive outlook for the market.
