Abstracts

The global lawn and garden consumables market size reached US\$ 20.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 25.9 Billion by 2028, exhibiting a growth rate (CAGR) of 3.99% during 2023-2028.

Lawn and garden consumables refer to various products used for the regular maintenance and landscaping of lawns and gardens. Some commonly used lawn and garden consumables include pesticides, fertilizers, seeds, mulch films, and growing media. They help improve the soil structure, increase the aesthetic appeal of the space, trap stormwater runoff, prevent overgrowth of plants, and control weed growth. Moreover, lawn and garden consumables also assist in filtering dust and other pollutants from the air, reducing soil erosion, curbing pollution, and enhancing indoor air quality. As a result, they have gained traction across the residential, commercial, and industrial sectors.

Lawn and Garden Consumables Market Trends:

The rising consumer interest in landscaping and home gardening and the increasing construction of residential and commercial buildings represent the primary factors driving the market growth. Besides this, the emerging trend of transforming outdoor spaces into relaxing areas, such as outdoor kitchens, lounges, entertainment areas, and party spots, is another major growth-inducing factor. Additionally, there has been a significant increase in the demand for landscaping products, such as water fountains, plants and gazebos, due to improving lifestyles, inflating consumer expenditure capacities, and rapid urbanization. Along with this, the growing consumer inclination toward home décor and the widespread adoption of hardscaping are catalyzing the product demand. Furthermore, several leading manufacturers are developing advanced

lawn and garden consumables that offer enhanced efficiency, convenience, and ease of use. Along with this, the launch of organic and natural product variants is propelling the market growth. Other factors, including the expanding real estate sector, rising trend of outdoor kitchens, favorable government policies, and increasing investments in urban green spaces and parks, are also providing a positive impact on the market growth.
