

# **LiDAR Market Report by Installation Type (Airborne, Terrestrial), Component (Laser Scanners, Navigation Systems, Global Positioning Systems, and Others), Application (Corridor Mapping, Engineering, Environment, Exploration, ADAS, and Others), and Region 2024-2032**

<https://marketpublishers.com/r/LCEC633DAD32EN.html>

Date: July 2024

Pages: 144

Price: US\$ 3,899.00 (Single User License)

ID: LCEC633DAD32EN

## **Abstracts**

The global LiDAR market size reached US\$ 2.6 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 12.3 Billion by 2032, exhibiting a growth rate (CAGR) of 18.4% during 2024-2032. The demand for autonomous vehicles, rising population in urban areas, and increasing precision agriculture is strengthening the growth of the market.

LiDAR Market Analysis:

**Major Market Drivers:** There is a rise in the demand for improved automated processing capability of LiDAR scanners. This, along with the increasing adoption of 3D imaging technology, is driving the market.

**Key Market Trends:** The growing applications of LiDAR in numerous industries and adoption of innovative technologies are facilitating the market growth.

**Geographical Trends:** North America holds the largest segment because of strong regulatory framework for autonomous vehicles mapping application.

**Competitive Landscape:** Some of the major market players in the LiDAR industry include Faro Technologies Inc, Innoviz Technologies Ltd., LeddarTech Inc., Leica Geosystems AG (Hexagon AB), NV5 Global Inc., Quanergy Systems Inc., RIEGL Laser Measurement Systems GmbH, Sick AG, Teledyne Technologies Inc, Trimble Inc., Valeo, Velodyne Lidar Inc., among many others.

**Challenges and Opportunities:** While the market faces challenges like a lack of

awareness about the LiDAR systems, which impacts the market, it also encounters opportunities in the integration of LiDAR with other technologies like artificial intelligence (AI).

#### LiDAR Market Trends:

##### Rising demand for autonomous vehicles (AVs)

The IMARC Group's report shows that the global autonomous vehicles market reached US\$ 81.0 Billion in 2023. AVs use high-tech sensors to identify the conditions of the surroundings and navigate the traffic environment independently. As safety is a top priority in the development of automated vehicles, the need of LiDAR sensor technology, which offer precise and reliable detection, is increasing continuously. Besides the cameras, radar and other sensors, LiDAR is used to create a real-time 360-degree view of the surroundings of AVs. LiDAR sensors provide precise distance measurements, allowing for informed decisions by AVs and safe navigation in all driving conditions like complex urban settings and challenging weather conditions.

##### Growing population in urban areas

The World Bank's report claims that around 50% of the population was residing in urban areas in 2023. There is a growing need for the development of efficient transportation systems and traffic management solutions. LiDAR technology is used to gather information on road networks, traffic patterns, and pedestrian flows, which, in turn, helps the transportation planners to optimize traffic signals, design the safer intersections, and plan the public transportation routes more efficiently. Besides this, the increasing urban population is leading to the need for more infrastructure development, such as roads, buildings and utilities. LiDAR technology is the main component of urban planning and development as it provides the 3D mapping and modeling of urban environments. Urban planners utilize LiDAR data to evaluate land use, study the transportation networks and to make the city layout for efficient use of space and resources, thereby contributing to the LiDAR market growth.

##### Increasing adoption of precision agriculture

The application of LiDAR technology in precision agriculture makes it possible to carry out sustainable farming by reducing the input usage, limiting the environmental impact, and improving the resource efficiency. In line with this, LiDAR technology aids in the precision planting and harvesting by providing the exact measurements of plant spacing, row alignment, and crop maturity. This data enables farmers to modify the

planting densities, reduce the crop damage during harvesting, and increase the harvesting efficiency, which, consequently, results in higher yields and lower operational costs. According to the IMARC Group's report, the global precision agriculture market is expected to reach US\$ 20.2 Billion by 2032.

#### LiDAR Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the market, along with LiDAR market forecasts at the global, regional, and country levels for 2024-2032. Our report has categorized the market based on installation type, component, and application.

#### Breakup by Installation Type:

Airborne  
Terrestrial

The report has provided a detailed breakup and analysis of the market based on the installation type. This includes airborne and terrestrial.

Airborne LiDAR systems are installed on the aircraft or drones which enable them to shoot a large portion of the terrain in a short time with great precision and efficiency. This ability shows that airborne LiDAR is perfect for tasks, such as topographic mapping, land surveying, urban planning, and forestry management. Besides this, airborne LiDAR is commonly used in the inspection of infrastructure, disaster management, and environmental monitoring, which involve remote or inaccessible areas, where access is not possible.

Terrestrial LiDAR systems are ground-based and usually fitted on tripods or vehicles, as they can record the 3D data of stationary objects or environments with high accuracy. They are used in several applications like topographic mapping, urban planning, infrastructure monitoring, and cultural heritage preservation. In the fields of surveying and mapping, terrestrial LiDAR systems are perfect for capturing detailed terrain and building feature, which helps in creating the accurate digital elevation models (DEMs) and the 3D city models. This, in turn, is catalyzing the LiDAR demand across the globe.

#### Breakup by Component:

Laser Scanners  
Navigation Systems

## Global Positioning Systems Others

Laser scanners holds the largest share of the industry

A detailed breakup and analysis of the market based on the component have also been provided in the report. This includes laser scanners, navigation systems, global positioning systems, and others. According to the report, laser scanners account for the largest market share.

Laser scanners emit laser beams and measure the time it takes for the light to return after hitting an object, thus creating highly detailed 3D maps of the surrounding environment. In industries, such as automotive, laser scanners are essential components for autonomous vehicles and advanced driver assistance systems (ADAS), providing a crucial data for navigation, obstacle detection, and collision avoidance. Additionally, laser scanners are extensively used in topographic mapping, urban planning, forestry management, and infrastructure inspection.

### Breakup by Application:

- Corridor Mapping
- Engineering
- Environment
- Exploration
- ADAS
- Others

Corridor mapping represents the leading market segment

The report has provided a detailed breakup and analysis of the market based on the application. This includes corridor mapping, engineering, environment, exploration, ADAS and others. According to the report, corridor mapping represents the largest segment.

Corridor mapping involves the detailed surveying and mapping of linear features such as roads, highways, railways, pipelines, and power lines. These infrastructure projects require precise and accurate data for design, construction, and maintenance purposes. LiDAR technology offers significant advantages in corridor mapping by providing high-resolution 3D data quickly and efficiently, even in challenging terrains or densely

vegetated areas. This data enables engineers, urban planners, and government agencies to assess existing infrastructure conditions, plan new developments, and optimize transportation networks effectively, thereby increasing the LiDAR market revenue.

#### Breakup by Region:

North America

United States

Canada

Asia-Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

North America leads the market, accounting for the largest LiDAR market share

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, North

America represents the largest regional market for LiDAR.

As per the International Trade Administration, Canada light vehicle market increased 6.6% to 1.64 million units in 2021. The growing sales of light vehicles in the United States are driving the demand of LiDAR primarily due to the increasing integration of LiDAR technology into advanced driver assistance systems (ADAS) and autonomous vehicle (AV) platforms. In addition, North America consists of large number of established LiDAR technology providers and key players, thereby driving innovations and advancements in technology in the industry. Moreover, there is a rise in the demand for LiDAR across multiple industries, such as automotive, aerospace, defense, and agriculture, in the region.

#### Competitive Landscape:

The market research report has also provided a comprehensive analysis of the competitive landscape in the market. Detailed profiles of all major LiDAR companies have also been provided. Some of the major market players in the LiDAR industry include Faro Technologies Inc, Innoviz Technologies Ltd., LeddarTech Inc., Leica Geosystems AG (Hexagon AB), NV5 Global Inc., Quanergy Systems Inc., RIEGL Laser Measurement Systems GmbH, Sick AG, Teledyne Technologies Inc, Trimble Inc., Valeo, and Velodyne Lidar Inc.

(Please note that this is only a partial list of the key players, and the complete list is provided in the report.)

Major players in the LiDAR industry offers innovative technologies to expand and survive in a competitive market environment. Additionally, key players are continuously investing in research and development (R&D) activities to increase their product offering, thereby bolstering the growth of the market. Besides this, many key manufacturers are also undertaking initiatives to grow their footprint across the globe, with LiDAR market recent developments like new product launches, mergers and acquisition, increasing investments, and collaborations with other industries. For instance, in 2022, FARO Technologies, Inc. announced the acquisition of SiteScape, an innovator in LiDAR 3D scanning software solutions for the AEC and O&M markets. SiteScape enables LiDAR equipped mobile devices to easily capture indoor spaces digitally.

#### LiDAR Market News:

September 1, 2022: Faro Technologies, Inc. announced the acquisition of UK-based GeoSLAM, a leading provider of mobile scanning solutions with proprietary high-

productivity simultaneous localization and mapping (SLAM) software to create 3D models for use in digital twin applications.

November 17, 2022: Velodyne Lidar, Inc. announced a multi-year agreement to provide its LiDAR sensors to GreenValley International for handheld, mobile, and unmanned aerial vehicle (UAV) 3D mapping solutions, including in GPS-denied environments.

### Key Questions Answered in This Report

1. What was the size of the global LiDAR market in 2023?
2. What is the expected growth rate of the global LiDAR market during 2024-2032?
3. What are the key factors driving the global LiDAR market?
4. What has been the impact of COVID-19 on the global LiDAR market?
5. What is the breakup of the global LiDAR market based on the component?
6. What is the breakup of the global LiDAR market based on the application?
7. What are the key regions in the global LiDAR market?
8. Who are the key players/companies in the global LiDAR market?

## Contents

### **1 PREFACE**

### **2 SCOPE AND METHODOLOGY**

- 2.1 Objectives of the Study
- 2.2 Stakeholders
- 2.3 Data Sources
  - 2.3.1 Primary Sources
  - 2.3.2 Secondary Sources
- 2.4 Market Estimation
  - 2.4.1 Bottom-Up Approach
  - 2.4.2 Top-Down Approach
- 2.5 Forecasting Methodology

### **3 EXECUTIVE SUMMARY**

### **4 INTRODUCTION**

- 4.1 Overview
- 4.2 Key Industry Trends

### **5 GLOBAL LIDAR MARKET**

- 5.1 Market Overview
- 5.2 Market Performance
- 5.3 Impact of COVID-19
- 5.4 Market Forecast

### **6 MARKET BREAKUP BY INSTALLATION TYPE**

- 6.1 Airborne
  - 6.1.1 Market Trends
  - 6.1.2 Market Forecast
- 6.2 Terrestrial
  - 6.2.1 Market Trends
  - 6.2.2 Market Forecast

## **7 MARKET BREAKUP BY COMPONENT**

### 7.1 Laser Scanners

#### 7.1.1 Market Trends

#### 7.1.2 Market Forecast

### 7.2 Navigation Systems

#### 7.2.1 Market Trends

#### 7.2.2 Market Forecast

### 7.3 Global Positioning Systems

#### 7.3.1 Market Trends

#### 7.3.2 Market Forecast

### 7.4 Others

#### 7.4.1 Market Trends

#### 7.4.2 Market Forecast

## **8 MARKET BREAKUP BY APPLICATION**

### 8.1 Corridor Mapping

#### 8.1.1 Market Trends

#### 8.1.2 Market Forecast

### 8.2 Engineering

#### 8.2.1 Market Trends

#### 8.2.2 Market Forecast

### 8.3 Environment

#### 8.3.1 Market Trends

#### 8.3.2 Market Forecast

### 8.4 Exploration

#### 8.4.1 Market Trends

#### 8.4.2 Market Forecast

### 8.5 ADAS

#### 8.5.1 Market Trends

#### 8.5.2 Market Forecast

### 8.6 Others

#### 8.6.1 Market Trends

#### 8.6.2 Market Forecast

## **9 MARKET BREAKUP BY REGION**

### 9.1 North America

- 9.1.1 United States
  - 9.1.1.1 Market Trends
  - 9.1.1.2 Market Forecast
- 9.1.2 Canada
  - 9.1.2.1 Market Trends
  - 9.1.2.2 Market Forecast
- 9.2 Asia-Pacific
  - 9.2.1 China
    - 9.2.1.1 Market Trends
    - 9.2.1.2 Market Forecast
  - 9.2.2 Japan
    - 9.2.2.1 Market Trends
    - 9.2.2.2 Market Forecast
  - 9.2.3 India
    - 9.2.3.1 Market Trends
    - 9.2.3.2 Market Forecast
  - 9.2.4 South Korea
    - 9.2.4.1 Market Trends
    - 9.2.4.2 Market Forecast
  - 9.2.5 Australia
    - 9.2.5.1 Market Trends
    - 9.2.5.2 Market Forecast
  - 9.2.6 Indonesia
    - 9.2.6.1 Market Trends
    - 9.2.6.2 Market Forecast
  - 9.2.7 Others
    - 9.2.7.1 Market Trends
    - 9.2.7.2 Market Forecast
- 9.3 Europe
  - 9.3.1 Germany
    - 9.3.1.1 Market Trends
    - 9.3.1.2 Market Forecast
  - 9.3.2 France
    - 9.3.2.1 Market Trends
    - 9.3.2.2 Market Forecast
  - 9.3.3 United Kingdom
    - 9.3.3.1 Market Trends
    - 9.3.3.2 Market Forecast
  - 9.3.4 Italy

- 9.3.4.1 Market Trends
- 9.3.4.2 Market Forecast
- 9.3.5 Spain
  - 9.3.5.1 Market Trends
  - 9.3.5.2 Market Forecast
- 9.3.6 Russia
  - 9.3.6.1 Market Trends
  - 9.3.6.2 Market Forecast
- 9.3.7 Others
  - 9.3.7.1 Market Trends
  - 9.3.7.2 Market Forecast
- 9.4 Latin America
  - 9.4.1 Brazil
    - 9.4.1.1 Market Trends
    - 9.4.1.2 Market Forecast
  - 9.4.2 Mexico
    - 9.4.2.1 Market Trends
    - 9.4.2.2 Market Forecast
  - 9.4.3 Others
    - 9.4.3.1 Market Trends
    - 9.4.3.2 Market Forecast
- 9.5 Middle East and Africa
  - 9.5.1 Market Trends
  - 9.5.2 Market Breakup by Country
  - 9.5.3 Market Forecast

## **10 SWOT ANALYSIS**

- 10.1 Overview
- 10.2 Strengths
- 10.3 Weaknesses
- 10.4 Opportunities
- 10.5 Threats

## **11 VALUE CHAIN ANALYSIS**

## **12 PORTERS FIVE FORCES ANALYSIS**

- 12.1 Overview

- 12.2 Bargaining Power of Buyers
- 12.3 Bargaining Power of Suppliers
- 12.4 Degree of Competition
- 12.5 Threat of New Entrants
- 12.6 Threat of Substitutes

## **13 PRICE ANALYSIS**

## **14 COMPETITIVE LANDSCAPE**

- 14.1 Market Structure
- 14.2 Key Players
- 14.3 Profiles of Key Players
  - 14.3.1 Faro Technologies Inc
    - 14.3.1.1 Company Overview
    - 14.3.1.2 Product Portfolio
    - 14.3.1.3 Financials
  - 14.3.2 Innoviz Technologies Ltd.
    - 14.3.2.1 Company Overview
    - 14.3.2.2 Product Portfolio
    - 14.3.2.3 Financials
  - 14.3.3 LeddarTech Inc.
    - 14.3.3.1 Company Overview
    - 14.3.3.2 Product Portfolio
  - 14.3.4 Leica Geosystems AG (Hexagon AB)
    - 14.3.4.1 Company Overview
    - 14.3.4.2 Product Portfolio
  - 14.3.5 NV5 Global Inc.
    - 14.3.5.1 Company Overview
    - 14.3.5.2 Product Portfolio
    - 14.3.5.3 Financials
  - 14.3.6 Quanergy Systems Inc.
    - 14.3.6.1 Company Overview
    - 14.3.6.2 Product Portfolio
  - 14.3.7 RIEGL Laser Measurement Systems GmbH
    - 14.3.7.1 Company Overview
    - 14.3.7.2 Product Portfolio
  - 14.3.8 Sick AG
    - 14.3.8.1 Company Overview

- 14.3.8.2 Product Portfolio
- 14.3.9 Teledyne Technologies Inc
  - 14.3.9.1 Company Overview
  - 14.3.9.2 Product Portfolio
  - 14.3.9.3 Financials
  - 14.3.9.4 SWOT Analysis
- 14.3.10 Trimble Inc.
  - 14.3.10.1 Company Overview
  - 14.3.10.2 Product Portfolio
  - 14.3.10.3 Financials
  - 14.3.10.4 SWOT Analysis
- 14.3.11 Valeo
  - 14.3.11.1 Company Overview
  - 14.3.11.2 Product Portfolio
  - 14.3.11.3 Financials
  - 14.3.11.4 SWOT Analysis
- 14.3.12 Velodyne Lidar Inc.
  - 14.3.12.1 Company Overview
  - 14.3.12.2 Product Portfolio

## I would like to order

Product name: LiDAR Market Report by Installation Type (Airborne, Terrestrial), Component (Laser Scanners, Navigation Systems, Global Positioning Systems, and Others), Application (Corridor Mapping, Engineering, Environment, Exploration, ADAS, and Others), and Region 2024-2032

Product link: <https://marketpublishers.com/r/LCEC633DAD32EN.html>

Price: US\$ 3,899.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
