Abstracts

The global local anesthesia drugs market size reached US\$ 2.9 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 3.8 Billion by 2028, exhibiting a growth rate (CAGR) of 4.2% during 2023-2028.

Local anesthesia drugs are chemical compounds producing anesthesia by inhibiting the excitation of nerve endings or blocking conduction in peripheral nerves. They are generally available as topical creams or administered via injections or sprays during minor surgeries, biopsies, dental care, labor and delivery, and obstetrical procedures. They help treat painful conditions, such as mouth ulcers and sore throat, and relieve itching caused by cuts, minor burns, sunburns, scratches, insect bites, and poison ivy. They also assist in rapid and effective pain relief during gastritis, esophagitis, hiatus hernia, and heartburn of peptic ulcer.

Local Anesthesia Drugs Market Trends:

The rising prevalence of cardiovascular, respiratory, and other chronic diseases that need several procedures, such as cochlear implantation, laparoscopic colectomy, laparoscopic hysterectomy, secondary hip replacement, and knee replacement, represents one of the key factors bolstering the market growth. Furthermore, the growing geriatric population undergoing surgical interventions that require post-operative pain relief is catalyzing the demand for local anesthesia drugs across the globe. Moreover, the increasing number of dental surgeries, in confluence with the introduction of novel and effective medicines like articaine, levobupivacaine and ropivacaine, is propelling the market growth. Apart from this, due to the increasing consciousness about physical appearance among individuals, there is a rise in the demand for minimally invasive (MI) cosmetic surgical procedures, such as botulinum

toxin and facial filler injections, which is contributing to the market growth. In addition to this, expanding medical tourism activities, along with developments in the healthcare infrastructure, are creating a positive market outlook. Besides this, technological advancements, including computer-based local anesthetic delivery and vibrotactile devices, are anticipated to provide a positive thrust to the market.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global local anesthesia drugs market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on drug type, mode of administration and distribution channel.

Breakup by Drug Type:

- Lidocaine
- Bupivacaine
- Benzocaine
- Ropivacaine
- Prilocaine
- Chloroprocaine
- Others

Breakup by Mode of Administration:

- Injectables
- Surface Anesthetic

Breakup by Distribution Channel:

- Hospital Pharmacy
- Pharmacy Stores
- Others

Breakup by Region:

- North America
- United States
- Canada
- Asia-Pacific

China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Aspen Pharmacare Holdings Limited, B. Braun Melsungen AG, Baxter International Inc., Endo International plc, Fresenius SE & Co. KGaA, Hikma Pharmaceuticals plc, Pacira Biosciences Inc., Pfizer Inc., Pierrel S.p.A. and Septodont.

Key Questions Answered in This Report:

How has the global local anesthesia drugs market performed so far and how will it perform in the coming years?

What has been the impact of COVID-19 on the global local anesthesia drugs market?

What are the key regional markets?

What is the breakup of the market based on the drug type?

What is the breakup of the market based on the mode of administration?

What is the breakup of the market based on the distribution channel?

What are the various stages in the value chain of the industry?

What are the key driving factors and challenges in the industry?

What is the structure of the global local anesthesia drugs market and who are the key

players?

What is the degree of competition in the industry?
