Abstracts

The global medical lifting slings market size reached US\$ 883.9 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 1,600.4 Million by 2028, exhibiting a growth rate (CAGR) of 10.40% during 2022-2028.

Medical lifting slings are assistive devices that help in the manual and mechanical transfer of patients that are unable to move. They also assist in creating an optimal working condition and providing quality care while giving the user a sense of security and control. They are made from a variety of materials, including nylon, padded, mesh, canvas, polypropylene, and cotton. They are durable and easy to use and provide optimal functionality to both patients and caregivers. As a result, they are widely utilized in hospitals and home care centers to transfer patients safely from the bed, toilet, and wheelchair. Presently, leading manufacturers are introducing medical lifting slings that eliminate the risk of musculoskeletal injuries and accidents caused during the lifting, repositioning, and transferring of patients.

Medical Lifting Slings Market Trends:

Road accidents and traumatic experiences are the leading causes of disability that can injure the spinal cord, fracture bones and limbs, and lead to brain damage. This, in confluence with a considerable rise in the number of fatal road accidents, represents one of the key factors bolstering the market growth. In addition, the increasing prevalence of arthritis, obesity, fibromyalgia, osteoporosis, neurological disorders, and Parkinson's disease, which can escalate the risk of developing mobility impairment, is contributing to market growth. Moreover, the incidence of physical disabilities gradually increases with advancing age. This, in confluence with the growing geriatric population

across the globe, is positively influencing the need for assistive devices like medical lifting slings to obtain mobility. Apart from this, several market players are launching novel designs integrated with advanced systems to expand their product portfolio and existing market share. This is anticipated to create a positive outlook for the market.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global medical lifting slings market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on product, material, usage type and end user.

Breakup by Product:

- Standing Slings
- Seating Slings
- Universal Slings
- Bariatric Slings
- Transfer Slings
- Others

Breakup by Material:

- Nylon Slings
- Padded Slings
- Canvas Slings
