Abstracts

The global menstrual cup market size reached US\$ 1,000 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 1,300 Million by 2028, exhibiting a growth rate (CAGR) of 4.47% during 2022-2028.

A menstrual cup is a female hygiene product used during menstruation to collect menstrual fluid and prevent leaking. It is a bell-shaped cup with a stem at its base. The cup collects the blood flow and aids in maintaining the adequate pH level in the vagina. Menstrual cups are available in a wide variety of shapes and sizes depending upon the age of the user. They are manufactured using medical-grade flexible silicone, latex rubber and thermoplastic elastomers. In comparison to the traditionally used sanitary pads and tampons, these cups are environmentally friendly and collect the flow instead of absorbing it. They can be removed, cleaned and reused after every few hours. They are also available in disposable and reusable variants that need to be sterilized in boiling water before use.

Menstrual Cup Market Trends:

The increasing awareness regarding female hygiene across the globe is one of the key factors creating a positive outlook for the market growth. Moreover, rising awareness regarding the benefits of menstrual cups over sanitary pads and tampons is also providing a thrust to the growth of the market. Menstrual cups reduce the risks of infections, prevent odor, hold more blood and are highly hygienic. Additionally, various product innovations, such as the integration of smart technologies in the menstrual cups, are acting as other growth-inducing factors. Product manufacturers are launching variants that can be integrated with smartphone applications through Bluetooth technology to indicate changes in the color of menstrual blood and detect possible health risks. Other factors, including rising expenditure capacities of the consumers,

along with the implementation of favorable government policies and campaigns promoting public health, are anticipated to drive the market toward growth.
