Abstracts

The Mexico dental implants market size reached USD 106.3 Million in 2025 . Looking forward, IMARC Group expects the market to reach USD 151.8 Million by 2034 , exhibiting a growth rate (CAGR) of 3.92% during 2026-2034 . The market is witnessing steady growth, driven by rising dental tourism, increasing elderly population, and expanding access to advanced implant procedures. In line with this, demand is supported by modern clinics, skilled professionals, and growing awareness of long-term oral health solutions.

MEXICO DENTAL IMPLANTS MARKET TRENDS:

Rising Demand Due to Medical Tourism

Mexico is witnessing a steady rise in dental tourism, which is playing a major role in driving the market growth. Many patients from neighboring countries travel to Mexico to access high-quality dental care at more affordable rates. This growing cross-border movement has positioned Mexico as a popular hub for implant procedures. The Mexico dental implants market growth is also driven by the increasing reputation of cities like Tijuana, Cancun, and Los Algodones, known for their well-equipped clinics and skilled professionals. Patients are drawn to the convenience, personalized care, and modern treatment options available. For instance, in March 2025, Smile4EverMexico announced the launch of affordable dental care solutions for American patients facing rising dental costs. Located in Tijuana, the clinic will provide high-quality services, including dental implants and veneers, at prices significantly lower than those in the U.S. Patients can save up to 70%. The trust built through positive outcomes and word-of-mouth referrals continues to fuel demand. With rising international interest and expanding service

offerings, the Mexico dental implants market outlook remains strong and poised for sustained expansion.

Growth in Aged and Edentulous Population

The increasing proportion of elderly individuals in Mexico is a key factor boosting the demand for dental implants. According to the data published by PAHO, in 2024, Mexico's population reached 130 861 007, a 32.7% increase since 2000. Those aged 65 and older made up 8.2% of the population, while the dependency ratio improved to 48.7 per 100 active individuals. As age-related tooth loss becomes more common, more patients are seeking durable and functional solutions to restore oral health and improve quality of life. Implants are gaining preference over traditional dentures due to their stability, comfort, and long-term benefits. This shift in patient preference reflects a broader change in dental care expectations among older adults. The market is also witnessing greater awareness and acceptance of implant procedures among seniors, supported by growing access to skilled professionals and modern treatment facilities. As dental care becomes a priority for aging individuals aiming to maintain an active lifestyle, implant procedures are becoming more routine. These demographic and behavioral changes are positively influencing the Mexico dental implants market share across both urban and semi-urban regions.
