Abstracts

The Mexico orthopedic implants market size reached USD 873.5 Million in 2025. Looking forward, IMARC Group expects the market to reach USD 1,258.3 Million by 2034, exhibiting a growth rate (CAGR) of 4.01% during 2026-2034. The market is witnessing robust growth due to the growing aging population, rising orthopedic disorders, and increased access to advanced surgical procedures. Improving healthcare infrastructure and medical tourism are further boosting implant demand. Moreover, advancements in biocompatible materials and minimally invasive techniques are enhancing treatment outcomes, thereby contributing to steady growth in Mexico orthopedic implants market share.

MEXICO ORTHOPEDIC IMPLANTS MARKET TRENDS:

Growing Aging Population

Mexico's aging population is becoming a significant factor in the growth of the orthopedic implants market. As life expectancy increases and the population over 60 continues to rise, there is a corresponding surge in age-related musculoskeletal disorders, including osteoarthritis, osteoporosis, and degenerative disc diseases. According to the data published by PAHO, as of 2024, Mexico's population reached 130,757,097, a 32.7% increase since 2000. Those aged 65 or older comprise 8.2%, up 3.2 percentage points. The dependency ratio is 48.7 per 100 active individuals. Life expectancy rose to 75.3 years, 2.7 years higher than in 2000. These conditions often lead to joint degradation, chronic pain, and reduced mobility, making surgical intervention with orthopedic implants such as hip replacements, knee prostheses, and spinal fixation devices increasingly necessary. Elderly patients are also more prone to

fractures and injuries due to decreased bone density, further contributing to surgical demand. Healthcare providers are responding with improved geriatric care and expanded access to orthopedic services. As Mexico's senior demographic continues to grow, the sustained need for joint and bone-related procedures is expected to be a core driver of the orthopedic implants market nationwide.

Increase in Orthopedic Surgeries

The rising number of orthopedic surgeries in Mexico is a major contributor to the expanding demand for implants. A growing incidence of bone fractures, osteoarthritis, and musculoskeletal injuries particularly among aging individuals and physically active populations is driving the need for surgical treatments. According to the research report published by the American College of Rheumatology, by 2030, the prevalence of rheumatoid arthritis (RA) in Mexico is projected to reach 465.5 cases per 100,000 inhabitants, with incidence increasing to 27.9. By 2040, prevalence is expected to rise to 518.9 cases per 100,000, and mortality rates are anticipated to decrease to 1.1 per 100,000. Additionally, increased awareness of treatment options, improved diagnostic capabilities, and greater availability of specialized orthopedic centers have made surgery more accessible. Sports-related injuries, especially among younger demographics, are further contributing to surgical volumes involving implants like screws, plates, and prosthetic joints. Public and private healthcare facilities are increasingly equipped with advanced surgical technologies, supporting the adoption of modern implant solutions. With rising patient expectations for mobility restoration and quality of life, the frequency of orthopedic procedures continues to climb, serving as a key driver of Mexico orthopedic implants market growth.

MEXICO ORTHOPEDIC IMPLANTS MARKET SEGMENTATION:

IMARC Group provides an analysis of the key trends in each segment of the market, along with forecasts at the country and regional levels for 2026-2034. Our report has categorized the market based on product, type, biomaterial, and end user.

Product Insights:

Reconstructive Joint Replacements

Knee Replacement Implants

Hip Replacement Implants

Extremities

Spinal Implants

Spinal Fusion Implants

Vertebral Compression Fracture (VCF) Devices

Motion Preservation Devices/Non-Fusion Devices

Dental Implants

Root Form Dental Implants

Plate Form Dental Implants

Trauma

Orthobiologics

Demineralized Bone Matrix (DBM)

Allograft

Bone Morphogenetic Protein (BMP)

Viscosupplementation Products

Synthetic Bone Substitutes

Others

The report has provided a detailed breakup and analysis of the market based on the product. This includes reconstructive joint replacements (knee replacement implants, hip replacement implants, and extremities), spinal implants (spinal fusion implants,

vertebral compression fracture (VCF) devices, and motion preservation devices/non-fusion devices), dental implants (root form dental implants and plate form dental implants), trauma, orthobiologics (demineralized bone matrix (DBM), allograft, bone morphogenetic protein (BMP), viscosupplementation products, synthetic bone substitutes, and others), and others.

Type Insights:

Knee

Hip

Wrist and Shoulder

Dental

Spine

Ankle

A detailed breakup and analysis of the market based on the type have also been provided in the report. This includes knee, hip, wrist and shoulder, dental, spine, ankle, and others.

Biomaterial Insights:

Metallic Biomaterials

Stainless Steel

Titanium Alloy

Cobalt Alloy

Others

Ceramic Biomaterials

Polymers Biomaterials

A detailed breakup and analysis of the market based on the biomaterial have also been provided in the report. This includes metallic biomaterials (stainless steel, titanium alloy, cobalt alloy, and others), ceramic biomaterials, polymers biomaterials, and others.

End User Insights:

Hospitals

Orthopedic Clinics

Ambulatory Surgical Centers

A detailed breakup and analysis of the market based on the end user have also been provided in the report. This includes hospitals, orthopedic clinic, ambulatory surgical centers, and others.

Regional Insights:

Northern Mexico

Central Mexico

Southern Mexico

The report has also provided a comprehensive analysis of all the major regional markets, which include Northern Mexico, Central Mexico, Southern Mexico, and others.

COMPETITIVE LANDSCAPE:

The market research report has also provided a comprehensive analysis of the competitive landscape. Competitive analysis such as market structure, key player positioning, top winning strategies, competitive dashboard, and company evaluation quadrant has been covered in the report. Also, detailed profiles of all major companies have been provided.

KEY QUESTIONS ANSWERED IN THIS REPORT
