## Abstracts

The Mexico pet supplement market size reached USD 20.5 Million in 2025. Looking forward, IMARC Group expects the market to reach USD 31.1 Million by 2034, exhibiting a growth rate (CAGR) of 4.61% during 2026-2034. The market is increasing steadily with the support of heightening consumer awareness, changing purchasing habits, and growing distribution networks, coupled with sustained demand through high-quality standards, regulatory compliance, and an established supply chain in both local and foreign markets.

### MEXICO PET SUPPLEMENT MARKET TRENDS:

#### Growing Demand for Natural and Organic Pet Supplements

The Mexico pet supplement market outlook is witnessing a massive transition towards natural and organic supplements as pet owners increasingly become health and nutrition-conscious of their pets. Consumers are now looking for supplements in the form of organic ingredients that are free from additives, preservatives, and synthetic chemicals and are instead seeking natural options to cater to the overall welfare of their pets. For instance, in September 2023, Cargill re-launched its PINGO™ dog food brand in Mexico, launching meat-flavored puppy and adult formulas focusing on affordability, pet health, and sustainability due to changing consumer needs. Moreover, such a trend is especially prevalent among the owners of cats and dogs, who spend money on excellent formulations that promote vitality and longevity. The demand for organic pet supplements is also supported by an increased recognition of the possible health merits of natural nutrients, such as herbs, vitamins, and probiotics. Retailers and internet sites have followed suit, offering plant-based, grain-free, and chemical-free supplements that

cater to the increased demand for holistic pet care. As public awareness continues to build, natural and organic pet supplements are predicted to experience sustained Mexico pet supplement market growth.

### Increasing Popularity of Functional Pet Supplements

Functional pet supplements are growing in popularity in Mexico as owners seek specific fixes for certain ailments. For example, in September 2023, Purina's Unleashed Accelerator program was enlarged to Brazil and Mexico, with backing for pet care business ventures with tech-based solutions in nutrition, health, and sustainability, providing mentorship, investment, and industry access for expansion. Furthermore, supplements targeted to promote joint health, coat and skin conditions, digestion, and overall immunity are on the rise. This trend illustrates an increased focus on preventative medicine, with owners wanting to keep their pets healthy and avoid common afflictions that are part of aging, breed vulnerability, or nutritional deficit. Functional supplements are especially popular with aging animals, with owners using glucosamine, chondroitin, and omega-3 fatty acids as they focus on mobility and joint function. Furthermore, prebiotics and probiotics are being increasingly added to pet foods to support digestive well-being. As more attention is paid to longevity and health, the functional supplement industry continues to grow, buoyed by innovation in products and greater consumer understanding of the merits of customized pet nutrition.

### Expansion of Online Pet Supplement Sales

The Mexico pet supplement market share is expanding fast online, supported by higher levels of digital uptake and customer preference for convenience. Online platforms and dedicated pet health websites have made it convenient for pet owners to access various supplements, compare brands, and make informed purchases. Subscription-based plans, with automatic pet supplement replenishment, have also become popular, guaranteeing pets a consistent supply of nutritional support. Online retailers offer extensive product descriptions, ingredient disclosure, and consumer reviews, which further promote informed purchasing behavior. Moreover, improvements in cold-chain logistics and secure packaging have enhanced consumer trust in buying pet supplements online. Promotional discounts, bundled purchases, and doorstep delivery further enhance the attractiveness of online shopping, making it a popular option among many pet owners. With rising internet penetration and the growing popularity of digital payment options, Mexican online sales of pet supplements will continue to grow.
