Abstracts

The Mexico retort pouches market size reached USD 32.0 Million in 2025 . Looking forward, IMARC Group expects the market to reach USD 55.3 Million by 2034 , exhibiting a growth rate (CAGR) of 6.08% during 2026-2034 . The market share is expanding, driven by rising demand for convenient and ready-to-eat (RTE) food products due to evolving lifestyles. This, along with the increasing need for durable packaging solutions to ship products, is fueling the market growth.

MEXICO RETORT POUCHES MARKET TRENDS:

Growing applications in pharmaceutical industry

Increasing applications of retort pouches in the pharmaceutical industry are positively influencing the market in Mexico. Retort pouches offer durability, sterility, and extended shelf life, which are essential features for storing pharmaceutical items, especially in regions with varying climate conditions. These pouches are also lightweight and easy to transport, making them suitable for both local and remote distribution. As the healthcare sector is modernizing, the demand for advanced packaging that ensures product safety and hygiene is rising. The flexibility and adaptability of retort pouches are supporting a wide assortment of pharmaceutical products, ranging from liquid medications to medical kits. The growing need for patient-friendly and tamper-evident packaging is further encouraging their use. Moreover, the rising incidence of chronic diseases like diabetes is catalyzing the demand for reliable pharmaceutical packaging solutions like retort pouches. As of October 2024, one out of every six Mexican adults were suffering from

type 2 diabetes mellitus (T2DM), making it the third main cause of death in the nation.

Increasing demand for convenient and RTE food products

Rising demand for convenient and RTE food items is offering a favorable Mexico retort pouches market outlook. Retort pouches offer an ideal packaging option that combines extended shelf life with ease of use, making them highly attractive for busy lifestyles. A high working population in Mexico is supporting this trend, as many individuals have limited time to prepare traditional meals. As per the data released by the Data Mexico, in the third quarter of 2024, Mexico's economically active population stood at 61.4 Million individuals. The lightweight and portable nature of retort pouches appeals to both single households and on-the-go users, further increasing their popularity. These pouches are widely employed for soups, curries, rice dishes, and baby food items, aligning with changing dietary habits. Additionally, their ability to preserve food products without refrigeration makes them a practical solution in both urban and rural areas. Food manufacturers are also benefiting from lower transportation and storage costs due to the flexible design.

Expansion of e-commerce platforms

The broadening of e-commerce sites is fueling the Mexico retort pouches market growth. As per industry reports, Mexico was positioned as the fifth quickly expanding e-commerce market worldwide, with retail e-commerce sales expected to hit USD 58.89 Billion in 2024. Retort pouches are ideal for e-commerce, as they are compact, cost-effective, and offer long shelf life, which is essential for products that need to be shipped over long distances. As more people are turning to online shopping, the demand for convenient and secure packaging is rising, and retort pouches meet these needs. Additionally, e-commerce companies are focusing on reducing shipping costs and improving packaging efficiency, which is making retort pouches an attractive option.
