Abstracts

The global microtome market size reached US\$ 159.8 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 214.1 Million by 2028, exhibiting a growth rate (CAGR) of 5.0% during 2022-2028. The growing prevalence of oncological disorders, rising adoption in the field of neuroscience, and increasing improvement in the healthcare infrastructure represent some of the key factors driving the market. Microtome is a specialized machine that is designed for precision tissue sectioning purposes and cutting thin and uniform slices of biological samples obtained from plants and animals. It comprises specialized blades made from metal, glass, or diamond, which are chosen as per the different specimens and sample thicknesses. It also consists of a block holder, knife clamps, block adjustments, a thickness gauge, and an operating handle. It is commercially sold in numerous forms, such as hand-held, rotational, vibrating, sledge, cryostat, and ultramicrotome. Microtome is also available as base-sledge microtome, which is useful for cutting extremely hard blocks and large sections, and the knife is sledge shaped, which requires less honing. It provides numerous cutting modes, such as single, interval, multi, and continuous high throughput serial sectioning. It is extensively used in histology to prepare tissue sections for examination under a microscope and diagnose diseases or investigate cellular structure and functions.

Microtome Market Trends:

At present, the increasing demand for microtomes due to the rising prevalence of oncological disorders around the world represents one of the significant factors influencing the market positively. Besides this, the growing utilization of semi and fully-automatic microtomes to extract minor sections of tissues and detect the presence of tumor cells in the body is offering a favorable market outlook. In addition, the increasing employment of microtomes in botany to make thin sections of plant tissues for examination of the structure and function of different plant parts, such as stomata, root

cells, and stem cells, is propelling the growth of the market. Apart from this, the rising adoption of microtomes in the field of neuroscience to prepare thin sections of brain and spinal cord tissue samples for detailed examination of the cellular and molecular structure of the nervous system and understanding the mechanisms of various neurological disorders is contributing to the growth of the market. Additionally, the increasing preference for using microtomes in various scientific laboratories, as they can be adjusted to produce tissue sections of varying thickness, allowing researchers and pathologists to tailor the sectioning procedure according to their needs, is supporting the growth of the market. Moreover, the rising improvement in the healthcare infrastructure to provide quality treatment and diagnosis to patients is bolstering the growth of the market.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global microtome market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on product, technology and end user.

Product Insights:

Microtome Devices

Rotary Microtome

Vibrating Microtome

Others

Accessories

The report has provided a detailed breakup and analysis of the microtome market based on the product. This includes microtome devices (rotary microtome, vibrating microtome, and others) and accessories. According to the report, microtome devices (rotary microtome, vibrating microtome, and others) represented the largest segment.

Technology Insights:

Fully Automated

Semi-Automated

Manual

A detailed breakup and analysis of the microtome market based on the technology has also been provided in the report. This includes fully automated, semi-automated, and manual. According to the report, fully automated accounted for the largest market share.

End User Insights:

Hospital Laboratories

Clinical Laboratories

Others

A detailed breakup and analysis of the microtome market based on the end user has also been provided in the report. This includes hospital laboratories, clinical

laboratories, and others. According to the report, hospital laboratories accounted for the largest market share.

Regional Insights:

North America

United States

Canada

Asia-Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, North America (the United States and Canada) was the largest market for microtome. Some of the factors driving the North America microtome market included the growing advancements in the medical sector, rising occurrence of chronic diseases, increasing prevalence of cancer among the masses, etc.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global microtome market. Competitive analysis such as market structure, market

share by key players, player positioning, top winning strategies, competitive dashboard, and company evaluation quadrant has been covered in the report. Also, detailed profiles of all major companies have been provided. Some of the companies covered AGD Biomedical Pvt Ltd., Amos Scientific Pty Ltd, Boeckeler Instruments Inc, Leica Biosystems Nussloch GmbH, LLS ROWIAK LaserLabSolutions GmbH, MEDITE GmbH, MICROS Produktions- und HandelsgesmbH, Sakura Finetek Europe B.V., SLEE medical GmbH, SM Scientific Instruments Pvt. Ltd., Thermo Fisher Scientific Inc., etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

Key Questions Answered in This Report:

How has the global microtome market performed so far, and how will it perform in the coming years?

What are the drivers, restraints, and opportunities in the global microtome market?

What is the impact of each driver, restraint, and opportunity on the global microtome market?

What are the key regional markets?

Which countries represent the most attractive microtome market?

What is the breakup of the market based on the product?

Which is the most attractive product in the microtome market?

What is the breakup of the market based on the technology?

Which is the most attractive technology in the microtome market?

What is the breakup of the market based on the end user?

Which is the most attractive end user in the microtome market?

What is the competitive structure of the global microtome market?

Who are the key players/companies in the global microtome market?
