## **Abstracts**

The global mobile application development platform market size reached US\$ 12.3 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 70.9 Billion by 2032, exhibiting a growth rate (CAGR) of 20.9% during 2024-2032.

Mobile application development platform (MADP) assists in designing, creating and maintaining software applications that run on mobile devices. It develops installable software bundles, such as codes, binaries and assets, implements backend services, and tests applications on targeted devices. These applications are either pre-installed during the manufacturing of mobile phones or delivered to application stores.

Nowadays, mobile application programmers are outsourcing backend infrastructure to cloud service providers for helping developers build innovative features and functionality without worrying about scalability, security, and reliability.

The rising dependence on smartphones for banking services represents one of the key factors escalating the demand for MADPs in the banking, financial services and insurance (BFSI) sector. Apart from this, they find application in the healthcare sector to

create mobile health (mHealth) applications that help treat individuals with chronic illnesses efficiently. Furthermore, rapid digitization and the emerging e-commerce industry are encouraging small and medium-sized enterprises (SMEs) to develop online shopping applications and expand their consumer base. This, in confluence with the escalating demand for innovative social networking and gaming applications, is also contributing to the market growth. Besides this, market players are introducing advanced MADPs that allow developers to build multi-channel applications with artificial intelligence (AI) capabilities. Moreover, the rising trend of smart devices, such as wearables and speakers, that use mobile applications to access features, is anticipated to provide lucrative opportunities to leading manufacturers in the future.

#### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global mobile application development platform market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on deployment type, application, organization size and end use industry.

#### Breakup by Deployment Type:

Cloud-Based

On-Premises

#### Breakup by Application:

Network Security

Web Security

Email Security

Database and Cloud Security

profiles of the key players being Appcelerator Inc. (Axway Inc.), Hewlett Packard Enterprise Company, International Business Machines Corporation, Microsoft Corporation, MicroStrategy Incorporated, Oracle Corporation, Salesforce.com Inc., SAP SE, Temenos AG and ViaSat Inc.

#### Key Questions Answered in This Report:

How has the global mobile application development platform market performed so far and how will it perform in the coming years?

What has been the impact of COVID-19 on the global mobile application development platform market?

What are the key regional markets?

What is the breakup of the market based on the deployment type?

What is the breakup of the market based on the application?

What is the breakup of the market based on the organization size?

What is the breakup of the market based on the end use industry?

What are the various stages in the value chain of the industry?

What are the key driving factors and challenges in the industry?

What is the structure of the global mobile application development platform market and who are the key players?

What is the degree of competition in the industry?
