Mosquito repellent is a type of chemical substance that is applied to the skin, clothes, or other surfaces to avoid mosquito bites. Mosquito repellent products help in preventing mosquito bites, thereby avoiding skin eruptions and rashes.

Of lately, there has been a surge in mosquito-borne diseases, such as dengue, malaria, chikungunya, etc., this along with increasing consumer health awareness have propelled the demand for mosquito repellents globally. Furthermore, rapid globalization coupled with the improving living standards of consumers particularly in emerging economies, such as India, China, Indonesia, Brazil, Mexico, Vietnam, etc. is also supporting the market growth.
