Abstracts

The global nonwoven fabrics market size reached US\$ 42.6 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 61.2 Billion by 2028, exhibiting a growth rate (CAGR) of 6.2% during 2022-2028.

Nonwoven fabrics refer to cohesive fabric-like textiles manufactured by arranging fibers together using heat, chemicals or pressure. Some of the commonly used production methods include fiber entanglement and chemical and thermal bonding of materials, such as olefin, polyester and rayon. In comparison to the traditionally used fabrics, such as cotton, linen, wool and silk, nonwoven fabrics are lighter, do not require weaving or knitting to manufacture interlinings, insulation and protection clothing, industrial workwear, chemical defense suits and footwear components. As a result, they find extensive applications across various industries, such as personal care & hygiene, automotive, healthcare, building & construction and filtration.

Nonwoven Fabrics Market Trends:

Significant growth in the textile industry across the globe represents one of the key factors creating a positive outlook for the market. This, in turn, is contributing to the market growth. Nonwoven fabrics are widely used to manufacture healthcare essentials, such as face masks, isolation gowns, drapes, single-use caps and shoe and headcovers. In line with this, the widespread adoption of these fabrics for the production of light-weight automobile components is also contributing to the growth of the market. Additionally, various product innovations, such as the development of smart nonwoven fabrics and blast-resistant curtains, are acting as other growth-inducing factors. These textiles expand under tension, thereby absorbing shockwaves and catching flying debris. Other factors, including the technological advancements in the manufacturing technologies, along with research and development (R&D) in the production of environment-friendly fabrics, are anticipated to drive the market further.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global nonwoven fabrics market report, along with forecasts at the global, regional and country levels from 2023-2028. Our report has categorized the market based on material type, technology and application.

Breakup by Material Type:

Polyester

Polypropylene

Polyethylene

Rayon

Competitive Landscape:

The report has also analysed the competitive landscape of the market with some of the key players being Ahlstrom-Munksjö Oyj, Berry Global Group Inc., DuPont de Nemours Inc., Fitesa S.A. and Affiliates (Petropar SA), Freudenberg Performance Materials SE & Co. KG, Johns Manville Corporation (Berkshire Hathaway), Kimberly-Clark Corporation, PFNonwovens Czech s.r.o. (PFNonwovens Holding s.r.o), Suominen Oyj, Toray Industries Inc. and TWE GmbH & Co. KG.

Key Questions Answered in This Report

1. What was the size of the global nonwoven fabrics market in 2022?
2. What is the expected growth rate of the global nonwoven fabrics market during 2023-2028?
3. What are the key factors driving the global nonwoven fabrics market?
4. What has been the impact of COVID-19 on the global nonwoven fabrics market?
5. What is the breakup of the global nonwoven fabrics market based on the material type?
6. What is the breakup of the global nonwoven fabrics market based on the technology?
7. What is the breakup of the global nonwoven fabrics market based on application?
8. What are the key regions in the global nonwoven fabrics market?
9. Who are the key players/companies in the global nonwoven fabrics market?
