Abstracts

The North America ice cream market size reached US\$ 14.8 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 20.9 Billion by 2032, exhibiting a growth rate (CAGR) of 3.8% during 2024-2032.

Ice cream represents one of the most popular frozen dairy products that is prepared from cream/butterfat, sugar and milk. It is a rich source of energy and contains high levels of carbohydrates, calcium, phosphorus and vitamins such as A, C, D, E, K, B-6 and B-12. It helps in de-stressing and provides a soothing effect to the consumer. Owing to this, ice-cream is widely consumed as a dessert and comfort food in households, bakeries, restaurants, hotels and other eateries.

North America currently represents one of the largest markets for ice-cream. This can be attributed to the rising health consciousness among consumers, prevalence of lifestyle diseases in the region and the easy availability of healthier and innovative variants such as low-fat, lactose-free, gluten-free ice-creams. Apart from this, the increasing popularity of organic and premium ice creams is also fueling the growth of the market in the region.
