Isopropyl alcohol (C₃H₇OH), also known as isopropanol, is a colorless, volatile and flammable chemical compound with a distinctive odor. It is miscible with various essential oils, removes flux, helps in sterilization, cleansing and deicing, and has several anti-bacterial and anti-fungal benefits. Owing to this, isopropyl alcohol is employed across diverse sectors such as pharmaceuticals, personal care and cosmetics, food processing, paints and coatings, printing, automotive, and liquid detergents.

North America represents one of the largest markets for isopropyl alcohol owing to the increasing demand in the pharmaceutical industry. Rapid influx of several products such as alcohol wipes and swabs, hand sanitizers, oral mouthwash, and eardrops has fuelled the demand for isopropyl alcohol in the region.
