## **Abstracts**

The North America IT training market size reached US\$ 27.9 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 36.6 Billion by 2032, exhibiting a growth rate (CAGR) of 2.9% during 2024-2032. The growing adoption in corporate offices to increase sales and productivity, wide availability through online and offline platforms, and rising utilization in schools and colleges to increase knowledge and skills of students represent some of the key factors driving the market.

Information technology (IT) training refers to a specialized training for computer, network, and technology careers. It comprises design, development, implementation, technical support, and maintenance and management. It is available through numerous online and offline platforms and allows an individual to work in a flexible environment. It increases productivity and efficiency of employees, streamlines the working process, minimizes downtime, and reduces the risk of losses in a business. It saves time, increases the revenue of a business, and improves teamwork among coworkers. It assists in upgrading the skills of staff in a cost-effective way and reduces the risk of fraud. It also aids in increasing motivation among individuals and allows employees to undertake new and different tasks and handle customer queries easily. Besides this, as it is beneficial in acquiring new skills and enhancing the chances of job retention and promotion, the demand for IT training is increasing in North America.

## North America IT Training Market Trends:

At present, the rising adoption of IT training due to rapid digitalization represents one of the key factors propelling the growth of the market in North America. Apart from this, the growing adoption of IT training in corporate offices to increase productivity and sales and reduce downtime of businesses is supporting the growth of the market in the region. Additionally, the rising demand for IT training in schools and colleges to enhance skills, knowledge, and performance among students is offering a positive market outlook. Furthermore, the wide availability of several IT training programs through online and offline platforms is offering lucrative growth opportunities to industry investors in the region. Besides this, the growing need to understand the latest developments in the IT field is positively influencing the market. Moreover, there is a rise in the preference for mobile-based IT training, as it offers easy access to information at any time and any place. This, coupled with the increasing demand for IT training due to the rising utilization of smart devices, such as computers, laptops, and watches, is impelling the growth of the market. In addition, the escalating demand for IT training due to the expansion of educational technology and e-learning methods is strengthening the growth of the market in North America.
