Market Overview:

The North America pharmaceutical contract packaging market size reached US\$ 8.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 13.1 Billion by 2028, exhibiting a growth rate (CAGR) of 7.6% during 2023-2028.

Pharmaceutical contract packaging refers to third-party packaging services, facilities and equipment offered for pharmaceutical products. There are different forms of packaging that are available in the market, which include bottles, pouches, packets, sachets, folding cartons, stick packs, jars, blister and clamshell packages.

Pharmaceutical contract packaging offers several benefits in warehousing, supply chain management, barcoding, regulated production, fabrication, designing, and prototyping of pharmaceutical products. Thus, the versatile nature of contract packaging, coupled with various technological advancements has positively influenced its demand across the globe.

The North America pharmaceutical contract packaging market is currently being driven by several factors. The escalating adoption of innovative packaging methods to satisfy rapidly changing consumer preferences and rising environmental concerns have stimulated the demand for contract packaging in the pharmaceutical industry. In addition to this, rising penetration of automation in pharmaceutical contract packaging has minimized risks of human handling errors, thereby catalyzing market growth in the region. Apart from this, high disposable incomes, coupled with rising consumer health awareness, are propelling the demand for pharmaceutical contract packaging in the region.
