## Abstracts

### Market Overview:

The North America wheat flour market size reached 14.8 Million Tons in 2022. Looking forward, IMARC Group expects the market to reach 24.9 Million Tons by 2028, exhibiting a growth rate (CAGR) of 9.1% during 2023-2028.

Flour refers to a fine powder that is produced by grinding starch-containing grains such as wheat, corn, barley, potatoes, soybeans, oats, rice, lima beans and rye. Amongst these, wheat is most commonly used as a raw material in the preparation of flour. Wheat flour is rich in essential nutrients required by the human body for improving metabolism and balancing cholesterol levels. It is also beneficial in controlling obesity, regulating blood sugar levels and improving heart conditions. Owing to these benefits, wheat flour is widely used in the preparation of several products across various food and non-food industries.

The North America wheat flour market is currently being driven by several factors. The increasing demand for wheat flour in the preparation of food items, such as pasta, bread, noodles and wafers, has fueled the market growth in the region. Other than this, the rising health consciousness among the consumers have also catalyzed the demand for wheat flour as a key food ingredient in the region. Apart from this, the increasing utilization of wheat flour-based products in the non-food sector, such as cosmetic and personal care, for producing shampoos, face creams, organic soaps and conditioners have further propelled the market growth.
