Market Overview:

The Oman dairy products and juice market size reached US\$ 649.2 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 856.8 Million by 2028, exhibiting a growth rate (CAGR) of 4.8% during 2023-2028.

The elevating levels of urbanization coupled with the increasing demand for ready-to-drink beverages and processed dairy products are propelling the market growth in Oman. Additionally, the changing consumer preferences from carbonated and artificial beverages towards natural and healthier alternatives, such as 100% fruit juices, are further augmenting the market. Moreover, the rising demand for clean-label dairy products that are free from chemical additives or artificial preservatives is also catalyzing the market growth. Apart from this, the wide presence of the Muslim population in Oman is further driving the demand for ethically-sourced dairy products and beverages complying with Islamic Shariah law. Additionally, the increasing penetration of numerous international key players in the country has led to the emergence of several innovative product variants. Besides this, the Oman government is heavily investing in the incorporation of automation technologies in dairy farms and beverage processing units, which will further continue to drive the market for dairy products and juices over the forecast period.
