Market Overview:

The Oman PVC products market size reached 82,800 Tons in 2022. Looking forward, IMARC Group expects the market to reach 100,010 Tons by 2028, exhibiting a growth rate (CAGR) of 2.6% during 2023-2028.

Oman's PVC products market comprises of pipes, electrical conduits and ducts, windows and doors, medical tubes, valves, road barriers and other consumer products such as boots, rainwear, etc. Amongst these products, pipes account for the majority share in the market and are used widely in sewerage and water distribution applications in the construction industry as well as for irrigation purposes in the agriculture sector of the country.

The PVC products market in Oman has been driven by the growth in the construction activities in the residential and commercial building sectors, transportation, infrastructure and tourism industries. Oman government is also focusing on diversification of economy and hence, promoting the growth of non-oil downstream industries, especially the manufacturing sector. In order to develop the small- and medium-scale industries in the country, Omani government is facilitating tax incentives and credit approvals, and also making amendments in policies in order to attract foreign direct investments. These factors are expected to keep the growth curve upward for the PVC products industry in the coming years.
