Abstracts

The 7 major oncocytoma markets are expected to exhibit a CAGR of 4.53% during 2024-2034.

The oncocytoma market has been comprehensively analyzed in IMARC's new report titled "Oncocytoma Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Oncocytoma refers to a type of tumor that can occur in various organs, most commonly in the kidneys and the thyroid gland. It is characterized by the presence of a large number of oncocytes, which are cells with a distinctive appearance due to an accumulation of mitochondria in the cytoplasm. These tumors tend to grow slowly and often do not cause noticeable symptoms until they become quite large or compress nearby structures. Some common indications associated with the ailment include blood in the urine, flank pain or discomfort, a palpable mass in the abdomen, a sensation of a lump in the throat, changes in voice, an enlarged thyroid gland, difficulty swallowing, etc. The diagnosis of oncocytoma typically requires a combination of clinical evaluation, medical history, imaging studies, and a physical examination. Ultrasonography is also recommended to help in identifying kidney tumors and providing detailed information about the size, location, and characteristics of the lesion. The healthcare provider may further confirm the diagnosis by performing a histopathological examination of a tissue sample obtained through a biopsy or surgical resection.

The increasing cases of genetic mutations, which can lead to alterations in the DNA of cells, resulting in uncontrolled growth and the formation of tumors, are primarily driving the oncocytoma market. Apart from this, the inflating utilization of immune checkpoint inhibitors to enhance the body's first-line defense mechanism against cancerous cells is

also creating a positive outlook for the market. Moreover, the widespread adoption of embolization techniques for the treatment of large tumors is further bolstering the market growth. These procedures work by blocking the blood supply to the cancer before its surgical removal, thereby improving clinical outcomes in patients. Additionally, the rising application of radiofrequency ablation therapy, on account of its various benefits, such as lesser pain, reduced risk of complications, and faster recovery compared to traditional open surgeries, is acting as another significant growth-inducing factor. Furthermore, the emerging popularity of minimally invasive cryoablation techniques to selectively target and disrupt the tumor while preserving surrounding healthy tissues is expected to drive the oncocytoma market during the forecast period.

IMARC Group's new report provides an exhaustive analysis of the oncocytoma market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for oncocytoma and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the oncocytoma market in any manner.

Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

Countries Covered

United States

Germany

France

United Kingdom

Italy

Spain

Japan

Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario

Historical, current, and future performance of the oncocyoma market

Historical, current, and future performance of various therapeutic categories in the market

Sales of various drugs across the oncocyoma market

Reimbursement scenario in the market

In-market and pipeline drugs

Competitive Landscape:

This report also provides a detailed analysis of the current oncocyoma marketed drugs and late-stage pipeline drugs.

In-Market Drugs

Drug Overview

Mechanism of Action

Regulatory Status

Clinical Trial Results

Drug Uptake and Market Performance

Late-Stage Pipeline Drugs

Key Questions Answered in this Report:

Market Insights

How has the oncocyoma market performed so far and how will it perform in the coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the oncocyoma market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the oncocytoma market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of oncocytoma across the seven major markets?

What is the number of prevalent cases (2018-2034) of oncocytoma by age across the seven major markets?

What is the number of prevalent cases (2018-2034) of oncocytoma by gender across the seven major markets?

How many patients are diagnosed (2018-2034) with oncocytoma across the seven major markets?

What is the size of the oncocytoma patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of oncocytoma?

What will be the growth rate of patients across the seven major markets?

Oncocytoma: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for oncocytoma drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the oncocytoma market?

What are the key regulatory events related to the oncocytoma market?

What is the structure of clinical trial landscape by status related to the oncocytoma market?

What is the structure of clinical trial landscape by phase related to the oncocytoma market?

What is the structure of clinical trial landscape by route of administration related to the

oncocyoma market?

14. ONCOCYTOMA – CLINICAL TRIAL LANDSCAPE

14.1 Drugs by Status

14.2 Drugs by Phase

14.3 Drugs by Route of Administration

14.4 Key Regulatory Events

15 ONCOCYTOMA - MARKET SCENARIO

15.1 Market Scenario - Key Insights

15.2 Market Scenario - Top 7 Markets

15.2.1 Oncocytoma - Market Size

15.2.1.1 Market Size (2018-2023)

15.2.1.2 Market Forecast (2024-2034)

15.2.2 Oncocytoma - Market Size by Therapies

15.2.2.1 Market Size by Therapies (2018-2023)

15.2.2.2 Market Forecast by Therapies (2024-2034)

15.3 Market Scenario - United States

15.3.1 Oncocytoma - Market Size

15.3.1.1 Market Size (2018-2023)

15.3.1.2 Market Forecast (2024-2034)

15.3.2 Oncocytoma - Market Size by Therapies

15.3.2.1 Market Size by Therapies (2018-2023)

15.3.2.2 Market Forecast by Therapies (2024-2034)

15.3.3 Oncocytoma - Access and Reimbursement Overview

- 15.4 Market Scenario - Germany
 - 15.4.1 Oncocytoma - Market Size
 - 15.4.1.1 Market Size (2018-2023)
 - 15.4.1.2 Market Forecast (2024-2034)
 - 15.4.2 Oncocytoma - Market Size by Therapies
 - 15.4.2.1 Market Size by Therapies (2018-2023)
